## MAKING QUALITY AVAILABLE FOR EVERY ANGLER.

*Elbe has provided Scandinavian fishers with lures, rigs, and accessories since 1944. With a catalog ranging from classic lures such as the Interpilken and Sildekongen, to terminal tackle, floats, and lure boxes – with an exceptional price point – Elbe is the brand behind countless unforgettable Nordic angling experiences.*

## INTERPILKEN

Classic pilk for cod, skrei, catfish, haddock, pollock, coalfish and hallibut. The long coastline on the west side of Norway consists of deep fjords and seas. The North Sea, the Norwegian Sea and the Barents Sea are a part of the Atlantic Ocean and contain big fish. Interpilken is a classic and very popular among deep-sea fishermen. The shape of the jig creates large lateral movements under water. Equipped with powerful VMC® PermaSteel treble hooks. Rubber hose around the hook shaft for extra attraction.

### FEATURES

- Deep sea fishing
- Fast sinking
- Weight 80g - 500g
- Split Ring 16mm - Swivel no. 50
- VMC 9617 PS #2/0 - #8/0

## SILDEKONGEN

The Sildekongen is long-casting and works both in salt water after cod, haddock, pollock, coalfish, sea trout and mackerel, and can also be used for inland fishing. Holographic foil and a good finish. VMC® treble hooks ensure good hookset of your dream fish. Only modern bestseller colors in this series. Inland fishing technique: In highland lakes you throw a herring lure far in headwind and the lure sinks quickly down to the large trout and char. Fish in jerkily and let the lure sink regularly during winding.

## SEA FISHING ACCESSORIES

To hunt all kinds of fish in the sea, sabiki and rigged hooks and are superb baits. This type of artificial bait mimics the fish's natural food and should be given a natural movement pattern in the water to entice the fish to bite. This is bait which is often used in combination with a jig or a weight at the bottom of the rig to gain weight and get deep into the water. Both jig and the rig work as bait, and it happens very often that more than one fish bites at the same time. Different sea depths often requires different colors. It can also be used as a hanger when fishing from shore. Delivered on a practical foam plate.

## SEA FISHING ACCESSORIES

Specially developed by our own deep-sea fishing team and species-specified directly against that fish you are targeting. The rig-sets will simplify your choice considerably. Components only of the highest quality, including VMC® PermaSteel hooks are used. The rig-sets are delivered in packages where the bag has a zipper and can be used for storage between fishing sessions. The deep-sea fishing rigs are delivered on foam plates for easier storage.

## FISKEHARPER

Fishing at sea does not necessarily require a whole bunch of gear, and many of our most popular saltwater species like cod, skrei, haddock, pollock, coalfish and mackerel can be caught with a fishing harp. Does not require particularly great effort and patience either, you can simply throw out the line, make some movements and at the same time relax and just enjoy the day.

## FLOATS AND ACCESSORIES

Fishing with floats is very exciting and fun fishing. Tie it up with a worm-hook or a fly. The length of the leader is adjusted according to the length of the fishing rod and the depth where you fish. The leader should not be longer than the fishing rod as it makes casting more difficult.

## RUDI OTTER PRODUCTS

Rudi Otter products have a long and good tradition in Scandinavia. The Planer board is used to pull out a line of mounted flies. The products are classic examples of good old norwegian craftsmanship, and many have tried to copy them with varying degrees of success. Rudi Otter has from the first moment been considered to be one of the most effective fishing gear in Norwegian waters and lakes, and more and more fishermen discover how fun and exciting otter fishing really is.

JENSEN DODGER .....	666

**TROLLING**

**DIPSY DIVER®**

The special round shape and resulting multi-directional feature sets the Dipsy Diver® apart from all other divers and planers. A shift left or right, as indicated on the base plate, will cause the diver to track to port or starboard, allowing for large spreads of lures to be fished from a single boat. You'll cover more water when the Dipsy Divers are deployed. The adjustable trip mechanism can be set specifically for various lure sizes and the size of target fish.

**FEATURES**

- Directional design locks into multiple positions
- Larger sizes have heavy-duty welded ring construction
- Add optional "O" Rings to dive even deeper (dives to depth is with "O" Ring)
- Sizes 000, 001, 003 come with one "O" Ring and Adjustable Positive Trip Mechanism
- Size 030 comes with Duo-Lock Snaps and does not have trip mechanism
- UV Bright finish reflects more light energy, strengthening the Dipsy Diver®'s visibility

**TROLLING**

**COYOTE® CYCLONE FLASHER**

The Coyote Cyclone™ Flasher is an easy pulling, fully rotating flasher. The flasher rolls in a wide elliptical pattern imparting fish attracting flash and motion to your presentation. The center "Cyclone" blade rotates independently adding a strobing flash and vibration. The Kick-Fin design keeps the flasher rolling over a wide range of speeds.

**FEATURES**

- Fitted with heavy duty ball-bearing swivels and welded rings
- UV Bright finish reflects more light energy, strengthening the flasher's visibility
- Everglo finishes glow-in-the-dark

**TROLLING**

**JENSEN DODGER**

Slightly narrower for its similar length to the Herring Dodger, the Jensen Dodger will tolerate faster speeds preferred by anglers in the Great Lakes. It swims with a sharp side-to-side snap that livens the action of spoons, flies and lures. The selection of available finishes includes those proven over decades to be the top performing finishes for drawing the attention of salmon.

**FEATURES**

- Use with spoons, plugs, flies & bait
- Welded ring construction & fish-calling vibration
- Premium plating & polishing for maximum flash, tape finishes are all on one side
