Passionate anglers, with more than 100 years of experience in the manufacturing and marketing of fish hooks, we are committed to keeping on innovating to offer you constantly improved fish catching quality products while developing them in a more and more sustainable way. Being socially and environmentally responsible has always been at the heart of the VMC project. This is self-explanatory when we project the life of our factory over several centuries.

Our planet is beautiful and rich in natural resources including rivers, lakes, seas and oceans. This environment is under pressure from all sides and deteriorating. We fishermen, wardens of our aquatic environments, are aware of this. To meet this challenge, VMC is committed to limiting its impact on the planet and to support responsible fishermen who preserve our environment.

We work every day to reduce our greenhouse gas emissions. We substitute harmful products with greener alternatives. We are reducing our water consumption and our industrial waste. We have developed eco-responsible packaging. We always want to do better than the standards that are imposed on us as a manufacturer in the European Union. We also collaborate as much as possible with local companies for our various projects.

Our social commitment is just as important. We are proud of the average seniority of our employees, which is almost 15 years, and of having many employees whose families have contributed to the development of our factory for several generations, thus testifying to their attachment to the industrial adventure of VMC. This is the strength and expertise of VMC.

Much remains to be done to reduce our environmental impact and strengthen our social commitment. You have to be humble and move forward step by step. You can count on our determination.

The 2022/2023 season looks promising for VMC, with ever more technical, innovative products that meet the needs of anglers looking for excellence.

The whole VMC team wishes you a great season, tight lines and with good times on the water.

Cyrille Viellard

I VMC® POINTS I

INTRODUCTION

NEEDLE SHARP™

VMC® Needle Sharp™ is the very latest in premium point technology from VMC®, the result of a unique point-grinding process, chemically sharpened to perfection.

SPARK POINT®

Developed exclusively by VMC® for ultimate performance hooks. A premium point hardened by forming, followed by chemical sharpening ensures permanent hook sharpness. Front and back reinforcement ribs guarantee the point's rigidity. Energy channels increase the speed of penetration and optimise the point's driving force upon striking.

NEEDLE CONE

The result of a sharpening technique that gathers the metal fibers and squeezes them toward the center of the point. By compressing rather than cutting, VMC® has created a point equal or superior in sharpness to the best available and incredibly stronger.

CONE CUT®

The point that combines sharpness, structural stability and quality thanks to a conical tip, a triangular crest and a barb so fine that it assures, without force, a clean and perfect penetration beyond the barb.

CUTE POINT

The traditional hook point with excellent penetration capacity. This standard hook point is the most widely manufactured in the world. All VMC® hooks beginning with the number "9" have a standard Cut Point, unless otherwise indicated.

DYNACUT™ POINT

Developed for Big Game Fishing The geometry of the Dynacut point allows the hook to easily penetrate the hardest part of the jaw of Big Game species such as marlin, shark and giant tuna, instantly providing a perfect setting of the hook for a safe and clean fight.

I VMC® STEEL I

HI-CARBON STEEL

Carbon stabilizes iron during temperature changes. The higher the level of carbon, the stronger the steel. VMC® uses premium-quality high carbon steel to give a thinner hook the highest quality point and durability.

VANADIUM® STEEL

VMC® Vanadium® hooks owe their success to their lightness allied with their incredible resistance : up to 25 % increased strength. VMC® Vanadium® steel is perfect for any finesse-style hooks that require instant penetration.

STAINLESS STEEL

Reserved for special professional and premium sport hook series, stainless steel is perfect for deep sea fishing, salmon and big fish. Ultimate corrosion resistance requiring no further coating.

I VMC® COATING I

An optimum level of corrosion resistance exists for each individual fishing application. You can depend on VMC® coatings to preserve the unique sharpness, strength, shape and finish of our hooks for as long as you need them to last. The wide range of VMC® coatings offers an efficient solution adapted to every fishing condition.

● PS - PERMASTEEL®

1000+ HOURS !

These coloured hooks receive a thin layer of unique varnish that covers the hook without affecting the sharpness of its point. The varnish creates a shield on Hi-Carbon and Vanadium® steel by covering the entire hook surface. When fishing in freshwater, these VMC® coatings will preserve hook sharpness, strength and appearance to the highest possible level.

Tin and Tin Red coatings are highly recommended for all saltwater fishing applications, particularly those involving intense friction such as trolling or when in direct contact with stainless steel.

The perfect balance between coating thickness and point sharpness, to ensure optimum hook performance and resistance against corrosion.

Smooth P.T.F.E. coating is now available on a number of VMC® premium models. This technical coating improves hook discretion and increases penetration speed by 50 %.

The Coastal PTFE coating (CT) is 5 times more corrosion resistant than a PTFE. It increases the penetration speed by 50% compare to a classic black nickel coating. This exclusive technology is the result of 3 years intensive researches at the VMC factory in France. The new Coastal Black finish, unique to VMC®, is the ultimate combination of an innovative coating for extreme corrosion resistance and a premium hook finishing process for maximum sharpness.

The original anti-corrosion coating by excellence, exclusive to VMC®.

The Permasteel® secret formula creates a 100% protective shield for even the most vulnerable areas of the hook, whilst maintaining ultimate point sharpness.

VMC® Permasteel® prevents signs of corrosion in saltwater for over 1000 hours.

SALTWATER FINISH

BELLY PIKE RIG

| A premium 2X strong hook (size 2/0) dedicated to PIKE fishing. The gap, length and shape are especially designed to FIGHT pikes. | Tested & Approved for years on many Rapala® lures such as Peto or Haku. This Rig features a premium heavy duty split ring, a 49 wire strands (60Lb) for optimal flexibility during the fight and an exclusive spikepin (designed by VMC®) to firmly fix the rig into the softplastic! | The entire system is connected to a high quality swivel for an ultimate 360° rotation to avoid leverage during the fight. | High quality hooks and high quality rig mean more fish in your net, and so, much more fun. | The pack includes: 3 weights: 5, 10, 15g (2 matte black, 1 Firetiger) and one additional screw (size M). | Ideal for 4" - 6" (12cm - 18cm) softplastics.

A dark, moody photograph of a pond. In the foreground, several large, green lily pads float on the water, their surfaces glistening with droplets. The water is dark and still, reflecting the light. In the background, a fish is visible, its body partially obscured by the darkness and the reflection of the lily pads. The overall atmosphere is mysterious and serene.

A misty forest landscape with a lake and rocky foreground. The scene is dominated by a dense forest of evergreen trees, with a layer of mist or fog hanging over the water and the lower slopes of the forest. The foreground consists of large, flat, reddish-brown rocks. The overall atmosphere is serene and quiet.
