

A man wearing a black hoodie with the 'okuma' logo, a black cap, and orange sneakers is standing on a brick pier. He is holding a fishing rod and looking down at it. The pier is made of red bricks and is situated next to a body of water. There are green leaves and a red boat in the background.

# okuma

## RIISING WITH EVERY CHALLENGE

The average person might stumble upon a remote beach and find inspiration in the texture of the sand, curl of the waves and the salty spice of the air. For the community of anglers, however, playing witness to nature is far less satisfying than direct participation.

As we approach every piece of water, our attention inevitably falls to what lies beneath the surface: beneath the waves, off the point, on the edge of structure, at the intersection of currents. It's the fish and their habits, their power and speed that captivate our attention. Through rod and reel we find our connection. Some call it sport. We call it a way of life that's rich with experiences.

At Okuma Fishing Tackle, our goal is to enhance every encounter. Integrating the latest advancements in materials and construction techniques is a means to downplay the presence of the gear. Eliminate weight and increase feel. Enjoy a running fish instead of fearing it. Button down the drag and go toe-to-toe with complete confidence. Your focus is not on the equipment; it's on the fish.

Wherever your travels take you, from the local pond to distant reef, we're proud to be your partner in the discovery of what lies beneath.

# SPINNING REEL TECHNOLOGY

## MAXGEAR

Makaira reels feature a forged, machine cut stainless steel main gear paired with a 17-4 stainless steel pinion gear. This gear system is unmatched in this category.

## ALG

With today's super braided lines & lighter more compact reels, ALG offers anglers lighter weight gears without compromising on strength & durability. Adding to their longevity, ALG gears are anodized to hold up to the elements much better than traditional gearing materials.

## HDGII

Okuma's proprietary High Density Gearing II incorporates an extremely strong alloy composition with a special anti-corrosion coating process. The result is high density, corrosion resistant gears that are built to handle the severe elements & brutal strains placed on a reel's internal gear system.

## PRECISION ELLIPTICAL GEARING SYSTEM

The Precision Elliptical Gearing System advantage boils down to one thing & one thing only - performance. By regulating the speed of the spindle stroke, reels equipped with this system wind line more consistently & uniformly on the spool, resulting in level line lay. This creates less friction during casting for increased distance, greater accuracy & longer line life, as well as smoother, more uniform drag pressures. Pick up any Okuma reel equipped with this feature & feel for yourself the balance, smoothness & power that are all characteristics of the Precision Elliptical Gearing System.

## SPINNING REEL DUAL FORCE DRAG

DFD incorporates both surfaces of the spool to maximize high-end drag pressure, efficiency & overall smoothness. Mounted in the top of the spool & protected by the Hydro Block system is a multi-disc felt drag system that works in conjunction with a secondary drag system that is mounted under the spool. Even pressure is applied to both surfaces of the spool for maximum stability.

## LITECAST™

Litecast™ is the latest in Okuma's reel technology. Reels with the Litecast™ structure are composed using a magnesium material in the casting process, making the integrity of the reel incredibly strong & 15% lighter than aluminum alloy reels. Okuma Cedros Saltwater Spinning Reels feature the new Litecast™ construction.

## ALUMILITE FRAME CONSTRUCTION

AlumiLite construction incorporates Okuma's rigid aluminum body technology on spinning, trolling and fly reel designs. Aluminum frames are stronger and more rigid and are capable of withstanding more pressure and torque than traditional graphite frames. These lightweight, diecast aluminum frames provide more precise tolerances for precision gear alignment, maximum castability and ultimate durability.

## C-40X

Okuma's C-40X carbon technology utilizes a specially blended graphite polymer. The carbon fibers in this material are elongated & reinforced, creating a substantially stronger composite than standard graphite materials. At 25% lighter, 1.5 times stronger & 100% anti-corrosive, C-40X translates into an extremely lightweight & durable construction.

## TORSION CONTROL ARMOR

The Torsion Control Armor (TCA) design found on the new Inspria spinning reels is made with Okuma's C-40X long-strand carbon fiber technology. This not only makes the reel lighter, but also makes the reel extremely rigid which reduces twist & torque, keeping the internal parts in perfect alignment.

## CYCLONIC FLOW ROTOR

The Cyclonic Flow Rotor (CFR) was designed to create a "cyclonic" airflow, which significantly increases air flow through the ported rotor. This thoroughly tested design allows for a much faster drying time if the reel becomes wet, minimizing corrosion possibilities throughout the reel.

## CENTRIFUGAL DISC BAIL

Okuma's Centrifugal Disc Bail (CDB) is a unique new design that incorporates a heavier brass disc that is perfectly weighted & balanced to create a smoother & easier bail operation, while increasing the strength & stability of the overall bail function.

## ■ QUICK-SET

This system allows for instant handle engagement & eliminates all handle back play commonly found in many reels. This is accomplished by using a corrosion-resistant stainless steel roller bearing that engages the reel in one direction for rock-solid hook sets.

## ■ EFR II

The Even Flow Roller System utilizes a ball bearing under the line roller to maximize efficiency. This roller helps reduce line twists by freely rolling over the line roller without friction. Without this system, line will naturally twist when drag is pulled.

## ■ FLITE DRIVE™

In most reels, when the main shaft is moved up and down, a large area of friction is generated within the pinion gear which causes you to feel resistance when turning the handle. To reduce drag and achieve a free rotation, Okuma hollowed out the center of the pinion to reduce friction with the shaft. This change to the pinion gear creates the ultimate in stabilization and a friction-free handle winding experience.

## ■ BAITFEEDING SYSTEM

Okuma's baitfeeding system allows anglers to disengage their spinning reel spool & allow their bait to run freely. The baitfeeding system incorporates a secondary micro-adjustable drag system at the rear of the reel that allows for precise adjustment of the spool for bait control. In order to disengage this system simply turn the handle. The On/Off lever on the rear of the reel will automatically disengage the baitfeeding system so you can fight your fish with the main drag system.

## ■ RES II

The RES II System stands for Rotor Equalizing System. This second-generation RES System incorporates a computer-balanced weight precisely placed in the rotor. This weight allows for precision balance & eliminates all spool wobble for perfect alignments & smooth cranking.

## ■ HIGH PERFORMANCE BEARINGS

The balls used on the HPB's are constructed from the same high-grade stainless steel material as the bearing housing. These bearings were designed to be more than 10 times more resistant to saltwater than standard stainless steel bearings. These bearings may even outlast the angler himself.

## ■ HYDRO BLOCK

The Hydro Block design features a rubber gasket mounted in the top of a spinning reel spool. This rubber seal blocks water & foreign materials from entering the drag system. The Hydro Block system ensures that your drag washers always perform at optimal levels.

TESO

**SPINNING - SALTWATER**

**TESORO**

The ultimate saltwater performer, the Tesoro features an oversized brass drive gear for strength and durability – further enhanced by the Gearing Stabilization Design for improved gear alignment. The IPX-7 rated Hydro Sealed Body protects against full water submersion and splashing. Within the Tesoro's full-Alumilite body resides a Dual Force Drag system with a whopping 29,9 kgs of max drag power.

**FEATURES**

- Full-Alumilite Body & Sideplate
- IPX-7 Rated Hydro Sealed Body CFR: Cyclonic Flow Rotor
- Carbonite High-Output Drag with Cal's Drag Grease on Full Dual Force Drag
- 12HPB + 1RB Corrosion-Resistant Stainless Steel Bearings
- Dual Anti-Reverse System for Maximum Strength and Reliability
- Machined Aluminum Screw-In Handle Arm for Added Strength
- Smooth Machine-Cut Brass Gearing with an Over-Sized Drive Gear
- Gearing Stabilization Design for Gear Alignment
- Frictionless Main Shaft Design
- Oversized Titanium Spool Shaft for Maximum Strength-to-Weight Ratio

**SPINNING - SALTWATER**

**SALINA**

The Salina saltwater spinning reel's LITECAST magnesium alloy construction provides the strength and rigidity of aluminum – but 15 % lighter. Building on that foundation of muscle, the Salina offers a Dual Force Drag system with 20 kg max drag power. When fighting strong fish, the 3-point pinion gear stabilization design provides precise alignment, even under heavy loads.

**FEATURES**

- DFD: Precision Dual Force Drag System
- LITECAST Construction
- Multi-Disc Drag Adjustment for More Precise Settings
- 20 kg Max Drag | 6HPB + 1RB Corrosion-Resistant Stainless Steel Bearings
- Full Grease Pack Prevents Water Intrusion
- Rubber-Sealed Bearings for Ultimate Protection
- Machined Aluminum Screw-In Handle
- Machined Aluminum 2-Tone Anodized Round Knob
- Even Flow Roller System with DLC Coating
- Manual Bail Trip Function for Ultimate Reliability
- Machined Aluminum 2-Tone Anodized Spool

## SPINNING - SALTWATER

## CEDROS

Specifically designed for saltwater use, the Cedros spinning reels feature Okuma's Litecast Blade body design, Dual Force Drag System for extreme stopping power & our proprietary High Density Gearing with a special corrosion resistant coating. Combine this with a high-speed gear ratio & a customized aluminum handle, you have one of the best saltwater jig fishing reels on the market.

## FEATURES

- DFD: Precision Dual Force Drag system
- Multi-disc drag adjustment for more precise settings
- LITECAST: Body construction is 15% lighter
- CRC: Corrosion resistant coating process
- 6HPB + 1RB corrosion resistant stainless steel bearings
- Dual anti-reverse feature on 8000-14000 sizes
- Quick-Set anti-reverse roller bearing
- Manual bail trip function 8000-14000 sizes
- HDGI: Corrosion resistant, High density gearing
- Precision machine cut brass pinion gear

## AZORES XP

Okuma Azores XP Spinning Reel is suitable for saltwater fishing, equipping with rigid diecast aluminum body, sideplate and rotor. It also features 6HPB + 1RB corrosion resistant stainless steel bearings, multi-disc, carbonite and felt drag washers for DFD, and corrosion-resistant, high density gearing.

## FEATURES

- DFD: Precision Dual Force Drag system
- Precision click drag adjustment for more precise settings
- Multi-disc, carbonite and felt drag washers for DFD
- 6HPB + 1RB corrosion-resistant stainless steel bearings
- Quick-Set anti-reverse roller bearing plus ratchet system
- Dual anti-reverse system for maximum security
- Precision machine-cut brass pinion gear
- CRC: Corrosion-resistant coating process
- HDGI: Corrosion-resistant, High-Density Gearing
- ALC: Rigid diecast aluminum body, side plate and rotor
- MSS: Carbon Mechanical Stabilizing System
- Machined aluminum, 2-tone anodized spool with LCS lip
- Machined aluminum handle arm for added strength
- Hydro Block water-tight drag seal

**BIG PIT - SURF**

**FLITE SURF**

The Flite Surf is designed for professional long casting and extremely light weight. Equipped with C-40X body and rotor, ultra-lightweight spool, screw-in handle and aluminum spool shaft for ultralightweight. Reduce wear and tear on fishing lines we designed a one-piece bail, and the other is a roller with a special DLC coating. All use HPB to achieve long-term corrosion resistance.

**FEATURES**

- 35mm stroke with super slow oscillation
- Light weight C-40X carbon frame and sideplates
- C-40X Cyclonic Flow Rotor for corrosion resistance
- One-Piece Bail
- Even Flow Roller System with DLC coating
- Frictionless main Shaft design
- Ultra-lightweight, A7075 aluminum shaft
- Ultra light Screw in handle
- Ultra light spool
- Rotor with tangle guard prevents line from entering the shaft
- Rotor brake system
- Carbon fiber drag system
- Fast progressive drag
- All HPB Bearing
- Worm shaft transmission system
- Comes with 2 spare spools (one aluminum and one red plastic)

## BIG PIT - SURF

## SURF 8K

Developed with the top surf fishermen, the Surf 8K spinning reel is designed to give anglers the ultimate distance on each cast. The reel's tapered long stroke spool minimizes resistance, while the Slow Oscillation System further reduces friction when casting – and generates an exceptionally smooth line lay upon retrieve. To match the reel's casting capabilities, underneath the Surf 8K's light yet durable graphite body lies six stainless steel bearings and a quick-set anti-reverse. The rigid metal handle allows you to utilize the fast progressive drag system's 40 lbs of fish-stopping power to its full extent. Designed for maximum durability against corrosion, the Surf 8K features a Hydro Block gasket to protect the drag system, while the proprietary Cyclonic Flow Rotor Technology ushers all excess moisture out of the reel's housing with a cyclone-like airflow.

## FEATURES

- Quick-set anti reverse roller bearing
- Slow oscillation system
- Fast drag system
- Double stainless steel line clickers
- Precision worm shaft transmission system
- Rotor brake system
- Hydro Block water tight drag seal
- With carbon washers
- Precision zinc handle arm with TPE ergo grip

## BIG PIT - SURF

## DISTANCE SURF ARENA

Okuma Distance Surf Arena spinning reels feature round metal line clip, fast progressive drag, worm shaft transmission system.

## FEATURES

- Slim Blade corrosion-resistant graphite body
- 3 ball bearings + 1 roller bearing
- Quick-set infinite anti-reverse system
- Machine-cut aluminum spool
- LCS: round metal line clip
- FPD: Fast Progressive Drag
- Rigid metal handle
- TPE T-Shape handle knob
- Worm Shaft transmission system
- Even Flow line roller
- Hydro Block water-tight drag seal

**ITX CB**

The all-new ITX CB has been meticulously crafted to meet the exacting standards of the highly competitive Japanese market (JDM). With its outstanding quality and durability, this spinning reel is ready to conquer both fresh and saltwater environments. The ITX CB features a robust C-40x body and rotor including full carbon handle, ensuring uncompromising strength while maintaining a remarkably lightweight design. Its super light " braid ready " spool combined with the frictionless main shaft further enhances its performance, providing smooth and effortless casting and retrieval. The ITX CB doesn't just excel in functionality; it also boasts a sleek and modern aesthetic, making it a stylish addition to your collection.

**FEATURES**

- Lightweight & rigid C-40X rotor & TCA construction
- Multi-disk Carbonite drag washers with Hydro Block gasket
- 7HPB + 1RB High Performance, grease packed bearings
- CFR: Cyclonic Flow Rotor Technology
- Lightweight and comfortable EVA handle knobs
- Precision machine cut brass pinion gear
- Quick-Set anti-reverse roller bearing
- Heavy duty, solid aluminum bail wire with DLC line roller
- RESIL: Computer balanced Rotor Equalization System

**ITX**

Designed for both fresh and saltwater applications, Okuma's ITX Carbon spinning reel breaks boundaries with its cutting-edge material innovations. The ITX Carbon features Okuma's long-strand C-40X carbon-fiber technology that enables a reel construction that's corrosion-resistant, durable – and lightweight. Paired with the screw-in handle made from machined aluminum and the twist-eliminating Torsion Control Armor technology, the result is a reel that maintains its rock-solid feel for seasons. The ITX Carbon's high-speed gear ratios, grease-packed high-performance bearings, and multi-disc carbon fiber drag system allow for a smooth and adrenaline-fueled angling experience – whether it's freshwater pike or inshore redfish you're targeting. The drag system's Hydro Block gasket is coupled with the proprietary Cyclonic Flow Rotor Technology that ushers all excess moisture from the reel's housing with a cyclone-like airflow.

**FEATURES**

- Lightweight and rigid C-40X carbon TCA and rotor
- Multi-disc, carbon fiber drag system with Hydro Block gasket
- 7HPB + 1RB High-performance, grease-packed bearings
- Quick-Set anti-reverse roller bearing
- CFR: Cyclonic Flow Rotor Technology
- Machined aluminum screw-in handle design
- TGT Grip: Traction Grip Technology
- High speed on all models
- Precision machine-cut brass pinion gear
- Machined aluminum, 2-tone anodized aluminum spool
- Heavy-duty, solid aluminum bail wire
- RESII: Computer-balanced Rotor Equalization System

## INSPIRA

The new generation of Inspira spinning reels combines the well-proven features of the best-selling reel with some of Okuma's latest material and design innovations. Designed for versatile freshwater applications, the lightweight Inspira packs an impressive amount of fish-fighting power in its multi-disc carbon fiber drag system. The updated construction features oversized HD gearing for a smooth yet powerful action, complimented by the Torsion Control Armor design that minimizes twisting of the reel stem when fighting the fish. Finished with a braid-ready spool and updated next-gen cosmetics, the competitive price tag ensures that no angler has to pass on excellence.

### FEATURES

- Lightweight and rigid aluminum TCA construction
- Flite Drive system increases gear stability and smoothness
- Multi-disc Carbonite and stainless-steel drag washer system
- 8BB+1RB Stainless steel bearings for ultimate smoothness
- Quick-Set anti-reverse roller bearing
- Oversized HDGII main gear with machine cut brass pinion gear
- Machined aluminum screw in handle design
- Lightweight TPE knob for maximum comfort
- Machined aluminum, braided line ready spool design
- Heavy duty, solid aluminum bail wire
- RESII: Computer balanced Rotor Equalizing System

# CEYMAR HD

Continuing the top-selling line-up, the Ceymar HD offers crossover performance for both fresh and saltwater anglers. The spinning reel's oversized drive gear delivers increased power and durability – while the Gearing Stabilization Design improves gear alignment for smooth and reliable operation. The Ceymar HD's machined aluminum screw-in handle is in direct contact with gears and reduces handle play and improves the overall feel while cranking.

### FEATURES

- HDG-II: High-Density Gearing II
- Oversized Gearing
- Corrosion-Resistant Graphite Body
- Gearing Stabilization Design
- Aluminum Screw-In Handle
- Flite Drive
- Even Flow Roller System with DLC Coating

**EPIXOR XT**

The Epixor XT spinning reels were designed with the latest technology and insight from leading fishermen around the country. The Epixor XT features graphite side plates and rotor, and Okuma's C-40X long-strand carbon fiber construction on its TCA- Torsion Control Armor frame design. Another key technology in the Epixor XT reels is the slow oscillation system. This slower oscillation system gives an exceptional line lay upon retrieve and is optimized for use with braided line.

**FEATURES**

- TCA™: C40x carbon TORSION CONTROL ARMOR® reduces twisting
- Multi-disc, Japanese oiled felt drag washers
- 7BB+1RB stainless steel bearings
- Quick-Set ant-reverse bearing
- Precision machine cut brass pinion gear
- Slow oscillation system for improved line lay
- Corrosion resistant graphite body and rotor
- CFR: Cyclonic Flow Rotor technology
- Rigid metal handle design for strength
- Machined aluminum, 2-tone anodized spool with LCS lip
- Heavy duty solid aluminum bail wire
- RESII: Computer balanced Rotor Equalizing System

NEW

# CEYMAR

The next generation of the immensely popular spinning reel, the Ceymar. Regarded as a trusted choice among anglers, this iconic workhorse comes with a host of exciting enhancements and a fresh new look. We've upgraded its internal workings to provide an even smoother and more efficient performance. One standout feature is the addition of a frictionless main shaft, ensuring a seamless retrieve and eliminating any unnecessary resistance. This new Ceymar also features a TPE- handle knob for a perfect grip.

### FEATURES

- Multi-disc, oiled felt drag system
- Flite drive system for increased smoothness
- 7BB+1RB for ultimate smoothness
- Quick-Set anti-reverse roller bearing
- Precision machine cut brass pinion gear
- Corrosion resistant frame, sideplate and rotor
- Rigid aluminum, black anodized handle design
- I-Shaped TPE handle knobs on 500-2500 sizes
- T-Shaped TPE handle knobs on 3000-4000 sizes
- Ergo grip handle knobs on 6000-8000 sizes
- Machined aluminum, 2-tone anodized spool
- Heavy duty, solid aluminum bail wire
- RESII: Computer balanced Rotor Equalizing System

## SAFINA PRO

Okuma Safina Pro Spinning Reel is with corrosion-resistant graphite body, featuring new graphite handle, quick-set infinite anti-reverse system and cyclonic flow rotor (CFR) that increases air flow through the ported rotor, increasing drying time and minimizing corrosion throughout the reel.

**FEATURES**

- Corrosion-resistant graphite body
- CFR : Cyclonic Flow Rotor
- 3 ball bearings + 1 roller bearing
- Quick-Set infinite anti-reverse system
- Machine cut brass pinion
- Precision elliptical oscillation
- RES II : Computer balanced Rotor Equalizing System
- Multi-disc, Japanese oiled felt drag washers
- Design rigid handle
- 2 tones aluminum spool
- New graphite handle
- T-shape handle knob from size 4000 and up

## ALARIS

New to the Okuma family are the feature packed Alaris spinning reels. The Alaris reels feature a corrosion resistant frame, side plates and Cyclonic Flow Rotor design, as well as machined aluminum 2-tone spool and rigid metal handle for strength and durability. With four stainless steel ball bearings, and multi-disc Japanese oiled felt drag washers, the Alaris runs smooth on the output of line and retrieve. Available in three sizes, ALS-20, ALS-30, and ALS-40, the Alaris spinning reels are a great reel for freshwater and light inshore action

## FEATURES

- Multi-disc, Japanese oiled felt drag washers
- 3 ball bearing + 1 roller bearing
- Quick-Set ant-reverse bearing
- Precision machine cut brass pinion gear
- Corrosion resistant graphite body and rotor
- Rigid metal handle design for strength

## PINK PEARL V2

Okuma Pink Pearl V2 Spinning Reels feature corrosion-resistant graphite body, TPE soft touch handle knob, and cyclonic flow rotor that allows for a much faster drying time if the reel becomes wet, minimizing corrosion and extending longevity of the reel.

## FEATURES

- Corrosion resistant graphite body and rotor
- 1+1 ball bearing
- Quick-set anti-reverse roller bearing
- Aluminum 2 tones anodized spool
- CFR: Cyclonic Flow Rotor technology
- Multi-disc, Japanese oiled felt drag washers
- RESII: Computer balanced Rotor Equalizing System
- TPE soft touch handle knob

## SPINNING - ALLROUND

## ARIA

New to the Okuma family are the Aria spinning reels. Performance at an unbeatable price point, all wrapped up into a compact body design. The Aria reels feature multi-disc Japanese oiled felt drag washers for a smooth output of line, as well as a one ball bearing drive for smoothness and durability. With its corrosion resistant graphite frame, side plates, and Cyclonic Flow Rotor, as well as machined aluminum anodized spool, the reel looks and feels sturdy.

## FEATURES

- Multi-disc, oiled felt drag washers
- 1 ball bearing drive for smoothness and durability
- Precision machine cut brass pinion gear
- Corrosion resistant body and rotor
- CFR: Cyclonic Flow Rotor technology
- Machined aluminum, anodized spool
- Corrosion-resistant stainless steel bail wire
- RESII: Computer balanced Rotor Equalizing System

**SPINNING - FEEDER**

**NEW**

**INVICTA**

It's all in the name. Standing for 'invincible', the Invicta is a feature-packed spinning reel built to meet the needs of the most dedicated Match & Feeder angler. The oversized drive gear delivers increased power and durability and the progressive silky smooth front drag never misses a beat. The Invicta's aluminum tapered spool lip is designed for smooth and effortless long distance casting whilst the seamless strong one-piece bail construction allows for smooth and safe transition of your line towards the roller. The Invicta features an aluminum screw in handle for direct contact with the gears and a rubberised ergonomic T-bar for easy grip and positive cranking. Two aluminium spools are supplied for convenience – both of which feature 2 round metal clips for fishing different spots.

**FEATURES**

- HDG-II: Oversized high-density gearing
- EFR-II: Even Flow Roller system with DLC coating
- Lightweight and machined aluminum screw in handle design
- Gearing stabilization design
- Flite Drive™
- Precision machine cut brass pinion gear
- Heavy duty, solid aluminum one piece bail wire
- Fast progressive drag for smoothness
- 2 large sized metal line clips for convenience
- Extra aluminum spare spool
- Lightweight and machined aluminum spool
- Multi-disc, Japanese oiled felt drag system
- 7+1 for ultimate smoothness
- Quick-Set anti-reverse roller bearing

## SPINNING - BAITFEEDER

### LS

Okuma LS reel is designed for long casting carp fishing, features on/off auto trip bait feeding system, slow oscillation system with long stroke spool trip 30mm and worm shaft transmission system make casting smoother and longer. Equips with oversized gear and fast progressive drag system in a compact body design to bring anglers better fishing experience. With the model LS-6K and LS-8K.

#### FEATURES

- Auto-switch freespool system
- Long Stroke spool trip 30mm
- Corrosion-resistant graphite body
- 5 ball bearing + 1 roller bearing
- Quick Set infinite anti-reverse system
- Machine cut aluminum spool
- Worm shaft oscillation system
- Machined cut brass pinion gear
- Heavy duty, solid aluminum bail wire
- Precision zinc handle arm with wooden handle knob
- RESII: Computer-balanced rotor system
- Slow oscillation system for improved line lay
- 2 round metal line clips
- Rotor brake system
- Fast progressive drag
- Metal air bail nut

### AVENTA BF

Okuma Aventa Baitfeeder spinning reels feature on/off auto trip bait feeding system allows anglers to disengage their spinning reel spool and allow their bait to run freely. Slow Oscillation System can improve line lay. Equip with one touch handle with wood knob. An extra aluminum spool can be a back-up system or for carrying different line sizes.

#### FEATURES

- On/Off auto trip bait feeding system
- 6+1RB bearing drive system for smoothness
- Quick set anti-reverse roller bearing
- Precision machine cut brass pinion gear
- Corrosion resistant graphite body
- Slow oscillation precision gearing system
- Machined aluminum spool
- Metal line clip
- Spare aluminum spool
- One touch handle with wood knob
- LCS Line control spool

REELS**

## BIG PIT - CARP

### OBSIDIAN

An extremely lightweight carp reel, the Obsidian is made with Okuma's C-40X carbon – the durable yet light graphite. The light and ergonomic feel is perfected by the ultralight spool and the frictionless main shaft design that eliminates resistance when reeling. Obsidian's super-slow oscillation, one-piece bail, and worm shaft transmission ensure exceptional line lay and superb casting.

#### FEATURES

- 35mm Stroke Spool with Super-Slow Oscillation
- Lightweight C-40X Carbon Frame & Side Plate
- C-40X Construction & Cyclonic Flow Rotor For Corrosion Resistance
- Ultralight Screw-In Handle
- Ultralight Spool
- Even Flow Roller System with DLC Coating
- Frictionless Main Shaft Design
- Ultra-lightweight A7075 Aluminum Shaft
- Rotor with Tangle Guard
- Prevents Line from Entering the Shaft
- Rotor Brake System
- Carbon Fiber Drag System
- Fast Progressive Drag
- Worm Shaft Transmission System
- One-Piece Bail
- Comes with Spare Aluminum Spool and 2 Line Reducer Adaptors

### T-REX

Okuma T-Rex Spinning Reel is designed by crossover construction and the handle is forged aluminum with wooden knob. It equips with solid reel system, worm shaft transmission system, fast progressive drag, and LCS line control spool that makes casting smoother.

#### FEATURES

- SRS : Solid Reel System
- Crossover Construction design
- Quick-Set anti-reverse roller bearing
- Worm shaft transmission system
- Precision machine cut brass pinion gear
- LCS : Line Control Spool for longer casting distance
- Fast Progressive Drag System
- Multi disc, Japanese oiled felt drag system
- Forged aluminum handle with wooden knob
- Hydro Block water tight drag seal
- Heavy duty, solid aluminum, anodized bail wire
- RESII: Computer balanced Rotor Equalizing System
- Aluminum spool
- Round metal line clip

**BIG PIT - CARP**

**8K**

The new standard for big pit carp reels. With its large-diameter spool and the Slow Oscillation System, Okuma's ultra-durable 8K spinning reel delivers incredible casting distance while ensuring a peerlessly smooth operation. Built for bulletproof endurance, the 8K's large bail arm and spool are both made from solid aluminum. The reel's fast progressive drag system boasts 18 kg of stopping power, making it the ideal companion for targeting big fish on big waters. For maximum anti-corrosion endurance, the 8K's Hydro Block technology seals the reel's drag system in a water-tight enclosure, while the Cyclonic Flow Rotor Technology ushers all excess moisture out of the reel's housing with a cyclone-like airflow. The 8K is finished with a tasteful black design and a weighted wooden handle knob that rests in a vertical position – always lining up perfectly.

**FEATURES**

- Quick-set anti-reverse roller bearing
- Slow oscillation system
- 5 ball bearings + 1 roller bearing
- Fast drag system
- Double stainless steel line clickers
- Precision Worm Shaft Transmission system
- Rotor brake system
- Hydro Block water-tight drag seal
- With carbon washers
- Precision zinc handle arm with wooden knob

**BIG PIT - CARP**

**INC**

Ultra-durability coupled with exceptional reliability and performance – Okuma's Inception is the carp reel to exceed your expectations. Available in sizes 6000 and 8000, the robust yet compact INC is built to last for years of rigorous use. The INC is fitted with oversized gearing for impressive cranking power, complemented by the spinning reel's fast progressive drag system. With a long stroke spool and the super-slow Worm Shaft Transmission System to reduce friction, the INC casts smooth, accurately – and with power. The sealed, corrosion-resistant graphite body is coupled with the proprietary Cyclonic Flow Rotor Technology that ushers all excess moisture from the reel's housing with a cyclone-like airflow. The INC is finished with a tasteful black design and a weighted wooden handle knob that rests in a vertical position – always lining up perfectly.

**FEATURES**

- Compact body
- Long Stroke spool 30mm
- Corrosion-resistant graphite body
- 3 ball bearing + 1 roller bearing
- Quick-Set infinite anti-reverse system
- Machine-cut aluminum spool
- 2 round metal line clips
- Rigid metal handle with wooden knob
- Worm shaft oscillation system
- Machine-cut brass pinion gear
- Heavy-duty, solid aluminum bail wire
- RESII: Computer-balanced rotor system
- Even Flow line roller
- Rotor brake system
- Fast progressive drag

**BIG PIT - CARP**

**CUSTOM BLACK**

From playing large carp to tackling hard-fighting pike, the Custom Black delivers both durability and performance – in a sublime matte black design. With the Even Flow Roller II technology to ensure exceptional line-lay and the Worm Shaft Transmission system to reduce friction on the line, the Custom Black casts smooth and accurately. And when it's time to play the fish, the spinning reel's fast progressive drag system takes you from locked-up to free-flowing in just a couple of clicks. For long-lasting durability, the Custom Black features a machine-cut black aluminum spool and a Hydro Block gasket to keep the reel corrosion-free. Available in sizes 6000 and 8000, the Custom Black is finished with a weighted wooden handle knob that rests in a vertical position – always lining up perfectly.

**FEATURES**

- 3+1 stainless steel bearings
- Quick-Set anti-reverse roller bearing
- Machine-cut anodizing alum spool
- Aluminum regular handle for CB-60/80; one touch handle for CB-60 QF
- Hydro Block system
- Even Flow Roller
- Worm Shaft Transmission system
- LCS line control spool
- Metal line clip
- Spare graphite spool

REELS**

# BAITCASTING REEL TECHNOLOGY

## FLITE™ SPOOL

Flight spool is a Dream Tackle Design allowing Okuma to offer a super tuned spool on our premium baitcast reels. The spool is 33mm in diameter and was developed for long distance casting as well as finesse style fishing. The complete spool design weighs in at just 0.33 ounces as a result of its uniform thickness, which is what helps set this super tuned spool apart from others.

## MCS

Okuma's Magnetic Control System reduces backlash & improves casting distance by utilizing the magnetic field generated by the high RPM spinning of the spool during casting. The magnetic field is influenced by the adjustable cast control magnets which exert an opposing force & allows for minute & accurate adjustments.

## VELOCITY CONTROL

The Velocity Control System is an adjustable, 6-pin centrifugal braking system for precision spool control. Weights can be adjusted IN or OUT for additional spool control. Positioning the weights in toward the spool allows for more freespool, while adjusting the pins out away from the spool allows for more control. Anglers can alternate weights until they find that perfect balance for casting.

## SPOOL ACCESS PORT

This unique new design can be found on Okuma's low profile baitcast reels. The Spool Access Port allows for quick access to the spool by simply sliding the lock/unlock lever on the sideplate opposite the handle. This system allows for quick spool changes, but more importantly it allows quick access for adjusting the Velocity Control System.

## FLITE™ SHAFT

Flite shaft is a patented hollow stainless steel spool shaft with precision stainless steel balls pressed on each end. These balls rotate under pressure to reduce friction and help increase casting distance. Providing the perfect balance point between weight, strength and smoothness.

## UNIVERSAL LINE DIAM INDICATOR

Always know what line you spooled on your reel when you pick it up.

## TGT (TRACTION GRIP TECHNOLOGY)

Okuma TGT is made of non-slip durable materials that not only provides maximum grip, but comfort and control in all weather conditions.

**BAITCASTING**

**HAKAI DT**

The new generation Okuma Hakai low-profile reel is developed with the latest technology and insights from top anglers across the globe. The main body uses Okuma's LITECAST magnesium alloy construction for ultimate strength and lightweight use. At only 167g, the Hakai features an extra compact body and is designed to fit comfortably in the palm of your hand.

**FEATURES**

- LiteCast magnesium frame: corrosion resistant coating
- Corrosion Resistant sideplates for maximum durability
- 42mm oversized hardened machine cut brass main gear
- Multi-disc Stainless Steel and Carbon Hybrid drag system
- Super tuned Flite Spool for maximum casting distance
- Patented fliteshaft hollow stainless steel main shaft
- Built in, universal line diameter indicator
- External adjustable magnetic cast control system
- Precision C-40x carbon injection star drag
- 6BB + 1RB stainless steel bearings for ultimate smoothness
- Quick-Set anti-reverse roller bearing for solid hook sets

**KOMODO SS**

Komodo reels, featuring stainless steel gearing and drive shafts, along with amazing levels of drag output, take on the largest freshwater fish like pike and salmon, along with the toughest inshore species like bass with a level of power and durability that is best in their class. The selection includes two sizes, with options in gear ratios and handles to deliver the perfect reel for your big fish applications.

- Stainless steel main gear for ultimate power and strength
- Precision machine-cut stainless steel pinion gear
- Heavy-duty stainless steel drive and spool shafts
- ALC: Rigid diecast aluminum frame and gear sideplate
- CRC: Corrosion-Resistant Coating process
- A6061-T6 machined aluminum, anodized spool
- Multi-disc high output Carbonite drag system
- Micro-click drag star for precise drag settings
- 350 size: 6HPB+1RB corrosion resistant stainless steel bearings
- 450 size: 7HPB+1RB corrosion-resistant stainless steel bearings
- Precision Japanese ABEC-5 spool bearings
- Dual anti-reverse for maximum reliability
- Quick-Set anti-reverse roller bearing
- 6-pin Velocity Control casting system
- Synchronized levelwind optimized for braided line
- Zirconium line guide inserts for use with braided line
- Available in both right and left hand retrieve
- On/Off clicker for trolling, chunking or bait fishing from size 300 and up

**CITRIX**

Okuma Citrix 350-size low profile reels are designed with rigid diecast aluminum frame and handle side plate provide more precise tolerances for precision gear alignment, maximum cast ability and ultimate durability. Multi-disc carbonite drag system that outputs 11 kg of maximum drag.

**FEATURES**

- ALC: Rigid diecast aluminum frame and handle side plate
- A6061-T6 machined aluminum, anodized V-shaped spool
- Multi-disc Carbonite drag system
- 7BB+1RB bearings drive system
- Micro-click drag star for precise drag settings
- External adjustable centrifugal cast control system
- Quick-Set anti-reverse roller bearing
- Zirconium line guide inserts for use with braided line
- Easy change palm side plate access port
- Ergonomic handle design allows cranking closer to body
- 6.4:1 gear ratio available in left hand retrieve
- Graphite sideplates
- Available gear ratios: 6.4:1

**SERRANO**

Okuma's new Serrano reels feature a lightweight, corrosion-resistant graphite body and side plates and are designed with a new, more compact body, all fitting nicely in the palm of your hand. The Serrano features a 6BB + 1RB precision stainless steel bearing drive system for long, smooth casting and the Quick-Set anti-reverse bearing bodes well for solid hook-sets. The precision-cut, high-strength brass main and pinion gears are smooth-running and very durable. The Serrano has plenty of stopping power with multi-disc drag washers for consistent performance.

**FEATURES**

- Rigid, corrosion-resistant frame and sideplate construction
- 6BB + 1RB precision stainless steel bearing drive system
- Quick-Set anti-reverse bearing for solid hook sets
- Precision-cut, high-strength brass main and pinion gears
- Externally adjustable magnetic cast control system
- 33.5mm machined aluminum, black anodized spool
- Multi-disc drags washers for consistent performance
- Double paddle, 95mm aluminum swept handle arm
- TGT Grip: Traction Grip Technology

**CEYMAR**

Okuma Ceymar Low Profile Baitcast Reel equips with corrosion-resistant graphite frame and sideplates, and A6061-T6 machined aluminum spool. It also features multi-disc composite drag system and sideplate access port which can change the spool quickly.

**FEATURES**

- Corrosion-resistant graphite frame and sideplates
- A6061-T6 machined aluminum, anodized U-shaped spool
- Multi-disc composite drag system
- 5BB+1RB bearing drive system
- External adjustable magnetic cast control system
- Quick-Set anti-reverse roller bearing
- Sideplate access port for quick spool changes
- Ergonomic handle design allows cranking closer to body

# SCORPIO

A corrosion-resistant graphite body, finished with exclusive metal parts painted in black and blue – and that’s just the body. The Scorpio Spinning reel features a quick-set infinite anti-reverse for jaw-shattering hook-sets, and the proprietary Cyclonic Flow Rotor technology to increase the airflow throughout the ported rotor, minimizing the risk of corrosion.

**FEATURES**

- Corrosion-resistant graphite body
- Exclusive metal black and purple paint
- 4 ball bearing + 1 roller bearing
- Quick-set infinite anti-reverse system
- CFR : Cyclonic Flow Rotor
- Machine-cut aluminum spool
- Graphite spare spool
- Smooth spool neck surface
- Zinc handle TPE flat knob
- Precision Elliptical Gearing System
- Machine-cut brass pinion gear
- Gunsmoke anodized bail
- RESII: Computer-balanced rotor system
- Even Flow line roller
- Multi-disc, Japanese oiled felt drag system

# CONVENTIONAL REELS

# MAKAIRA TROLLING REEL TECHNOLOGY

## DUAL FORCE DRAG SYSTEM

The specialized carbon DFD or Dual Force Drag system used on all Makaira reels was specifically engineered to be mounted in the right side of the spool in order to bring all the mechanical workings closer together to maximize alignment and durability. The farther mechanical parts are separated the more opportunity there is for tolerance error and flexing which causes parts alignment issues. The DFD principal was specifically designed around the "Pull Bar Drag System". The major advantage to a "Pull Bar Drag System" is that the drag is being pulled rather than pushed. The most common type of lever drag in the industry is the "Push Bar Drag System". The Push Bar System places heavy pressure on the left side plate and utilizes the frame for overall stability which is a fatal flaw in this type of design. This pressure creates frame flex, reducing drag pressure and causing tolerance alignment issues. This problem is further exaggerated on open top designs from other companies. One of the major benefits to the pull bar design is that there is no pressure placed on the frame. Therefore, our open top frame designs will not suffer frame flex found in our competitors reels.

This highly efficient drag system was designed and engineered by Tiburon Engineering USA to increase maximum drag pressure, reduce side load pressure on ball bearings and improve heat dissipation for long term smoothness over extended periods. This Okuma DFD is considered a wet drag system comprised of two carbon fiber drag washers that are sandwiched together and bonded with a fiber glass core. Pure carbon washers are coated with a thin layer of Cal Sheet's Universal drag grease for virtually zero start up inertia. These washers are compressed by two precision ground 17-4 grade stainless steel drag plates that have been ground flat then polished for maximum smoothness. These stainless steel friction drag plates have a minimum 32 Rockwell hardness allowing for high-end drag settings and consistently smooth drag performance at all ranges. The drag system is secured to the right side of the spool by a 6061-T6 grade aluminum cover that features Type-II anodizing for maximum alignment, strength and corrosion resistance.

## TOURNAMENT DRAG CAM IGFA LINE CLASSES FOR MAKAIIRA

Okuma's TDC or "Tournament Drag Cam" is designed with a more gradual ramp in the cam system that is intended for anglers fishing light line and tournament IGFA line classes. The standard cam that is installed in the Makaira reels is engineered to be compatible with braided line and offers aggressive drag ramps in order to output heavy drag ratings. The Makaira reels are engineered to output extreme drag pressure, but this is not required by all anglers. These reels have been designed to offer customization and with the TDC cam system, Okuma is offering anglers a reel that is versatile for a wide range of fishing applications, allowing anglers the ability to achieve a more gradual increase in drag settings.

## SILENT ANTI-REVERSE:

The Makaira's proprietary anti-reverse system allows for a smoother and quieter feeling. We equate this feeling to that of a Lexus, when compared to other reels in the market. Most reels in the market hide their rough gear quality by the noise and vibration caused by the engagement and clacking of the anti-reverse pawls. The Okuma silent system is unlike any other 2-speed reel in the industry for smoothness. This anti-reverse system is supported by a 12 point double dog anti-reverse pawl system. The Makaira system is very simple in principal but the performance is extremely advanced. As you turn the reel forward the anti-reverse pawls slide open allowing a friction free and quiet retrieve. As soon as the handle is stopped or pulled backwards the anti-reverse pawls are engaged into place by their drive shaft actuated sliding system. The strength of this anti-reverse system does not solely rely on a dog spring like found on most of our competitors reels. The sliding function does not rely heavily on a dog spring system and is mainly controlled by the forward and reverse movement applied to the drive shaft through the movement of the angler turning the handle.

## HELICAL CUT GEARING:

Makaira lever drag reels utilize helical cut main and pinion gears. This process allows for improved gear meshing which equates to improved gear smoothness. The angled teeth found in helical cut gears engage more gradually than straight cut or spur gear teeth. This allows helical gears to run smoother and quieter compared to spur gears. Spur gears cause impact stress and noise, because of the hard meshing and can not take as much torque as helical gears because their teeth are receiving impact blows as they mesh together.

## GREASE AND OIL:

To further enhance the corrosion resistance of Makaira reels, Okuma applies our CRC or Corrosion Resistant Coating process to all internal and external parts for maximum protection. Our CRC process utilizes a coating process of Corrosion X HD formula that actually penetrates and bonds to the aluminum parts for long term protection. The extra steps taken in the assembly of the Makaira allows this reel to be a leader in the fishing tackle industry for long term use and performance. To further enhance the Makaira's function and performance, Okuma applies Cal's Universal drag grease to our carbon fiber drag washers for the smoothest wet drag system. The addition of Cal's drag grease allows for virtually zero start up inertia and smooth performance at all settings. Cal's Universal grease is also used for coating moving parts such as the main and pinion gears for improved performance.

# TROLLING AND CONVENTIONAL REEL TECHNOLOGY

## XL GEARING

The XL gearing design found on both lever drag & star drag reels incorporates an oversized gear box that features an enlarged gearing system & enlarged drag system. The drag surface areas on this system are more than 50% larger than a standard gear-box design. For the gear system, the major advantage is that the gear teeth are substantially larger, allowing more strength & cranking power. This is how we are able to offer a high-speed gear ratio reel without sacrificing cranking power. Our XL gearing system essentially turns your reel into a winch.

## SELF LUBRICATING GEAR SYSTEM

The self-lubricating gear system is a feature found on Okuma's higher-end star drag reels. The main gear on this system incorporates a heat-sensitive oil-impregnated brass bushing that is mounted in the center of the gear. This system releases oil if friction increases to keep the main gear & drive shaft running smoothly in all conditions. Okuma is the first company to adopt this technology which originated in the large machine industry where this function has been time tested for many years.

## MACHINED RIGID FRAME

Okuma's Machined Rigid Frame construction incorporates a one-piece fully-machined aluminum frame. These rigid bar-stock aluminum frames are the ultimate in precision alignment & tolerances withstanding more pressure & torque than any other material used in our industry for frame materials. Okuma features these anodized frames on fly reels, baitcast reels, lever drag reels & star drag trolling reels.

## LEVER DRAG DUAL FORCE DRAG

For extremely smooth & strong drag outputs, Okuma's Makaira and Alijo's 2-speed reels are designed with a patented Dual Force Drag system. This drag system is specifically engineered to be mounted in the right side of the spool, designed around a Pull Bar Drag System which keeps all mechanical workings in precise alignment & places no pressure on the frame. This system works in conjunction with a custom designed thrust bearing, which alleviates side load at heavy drag settings.

## BODY ARMOR

Okuma's stainless steel Body Armor eliminates the frame flex commonly found in graphite framed trolling reels. This feature incorporates two large stainless steel rings that are mounted to both sides of the frame. The harness lugs are integrated into the body armor design & eliminate the pressure commonly placed on the harness lugs by redistributing the pressure to these large-diameter rings.

## 2-SPEED GEARING

Okuma's 2-speed technology incorporates two sets of stainless steel main & pinion gears, allowing anglers the option of a high-speed gear ratio or a powerful low-speed gear ratio for maximum power & torque. To shift gears it is as easy as pushing a button or popping a lever with Okuma's unique shifting design to obtain the appropriate gear ratio you desire.

## SPEED LOC PINION GEAR SYSTEM

The SLG technology incorporates a dual-step pinion gear system on star drag reels that allows positive engaging at extreme high speeds. The SLG system allows for instant gear engagement when engaging from freespool to strike at speeds in excess of 50 MPH.

## MSS

Strong, Stable, Smooth - Okuma's Mechanical Stabilizing System is a support system that ties the spool shaft, pinion gear, pinion gear bearing, drive shaft & main gear together with a single support system. While other reels on the market offer minimal or no gear stabilization, this patented Okuma design allows all of these critical parts to stay in precise alignment. Designed specifically to hold up to the demands of braided & wire line fishing, the MSS support system stabilizes the spool shaft at 3 key stress points to eliminate flex under pressure - which directly translates into a reel that is more durable, stronger & smoother than the competition.

## MCS

Okuma's Magnetic Control System is a fully-sealed, 100% waterproof cast control system that reduces backlash & improves casting distance by utilizing the magnetic field generated by the high RPM spinning of the spool during casting. The magnetic field is influenced by the adjustable cast control magnet which exerts an opposing force & allows for minute & accurate adjustments.

## WIDE MOUTH LEVELWIND

This heavy-duty, stainless steel levelwind is Titanium coated & built to withstand the punishment of both braided & wire lines. The guide has been designed with an increased opening to insure proper knot clearance when fishing with double lines. This wide space allows for Albright or similar connection knots, as well as swivels & copper line to pass through the guide easier & be wound directly on the spool.

## STRIKE ZONE

Okuma's Strike Zone linecounter system incorporates a mechanical counter that precisely measures line based on spool revolutions. These counters measure in feet & are calibrated at the factory to be most accurate with a full spool & monofilament lines.

## T-BAR HANDLE

T-Bar Handle: The patented design of the T-Bar handle offers a true ergonomically correct angle to ensure an angler gets maximum power with minimum fatigue. The T-bar takes full advantage of the natural dynamics of the human hand, wrist & forearm to help sustain power & endurance for the angler.

## ERGO GRIP

The Ergo Grip handle knob is an extremely comfortable oversized handle-knob design for both speed & power. This soft-touch knob has been ergonomically designed to fit in the palm of your hand & will be found on certain Okuma lever drag reels, star drag reels & some spinning reel models.

## HIPPO GRIP

The Hippo Grip is a unique reel-clamp design that serves triple duty when fishing offshore. This heavy-duty, forged aluminum reel clamp securely supports your reel to the rod for maximum safety. This clamp also incorporates a small hole that was designed to be used with a safety line for trolling. On the rear of the clamp is a large diameter hole that was designed to be used as a trigger. The large hole should be mounted facing the butt of the rod.

## CRC

Okuma's Corrosion Resistance Coating (CRC) consists of a thin layer of Corrosion X HD applied to all internal & external parts. The CRC process actually penetrates & bonds to the metal, which helps significantly in the reduction of corrosion, & towards the long term protection of your reel.

**CONVENTIONAL TROLLING**

**MAKAIRA**

Okuma Makaira lever drag reels are perfect for big game fisheries for billfish, large tuna, and sharks. With advanced, unique, and numerous patents, Makaira provides uncompromised excellence within every aspect of its design, construction, and performance.

**FEATURES**

- 6061-T6 machined aluminum frame with forged side plates
- 17-4 grade stainless steel gearing
- Helical cut gears for increased torque, smoothness and improved gear meshing
- Makaira reels all feature two-speed gearing systems
- Gold anodized two-speed gear shifter housing
- Cold-forged, Type-II anodized, machined aluminum spool
- CRC: Corrosion Resistant Coating process
- Patented spool pin system for use with braided or mono lines
- Carbonite Dual Force drag system featuring Cal's universal drag grease
- Custom designed thrust bearing: Alleviates side load on heavy drag settings
- 4-pcs ABEC-5 precision Sapporo stainless steel ball bearings
- MK-80WII features 6-pcs of Sapporo ball bearings
- Double-dog, proprietary silent anti-reverse system
- Ratcheting drag lever and pre-set knob for precise drag setting
- Patented T-Bar handle with Easy Roll graphite insert on all models
- Heavy-duty stainless steel ratcheting clicker system
- Heavy-duty, 17-4 grade stainless steel drive and spool shafts
- Type-II gold anodized frame, sideplates, spool, drag lever and handle
- Open top frame design on 16II, 20II, and 50II
- Lug and plug system on all open top reel models
- Machined thumb rest on rear cross bar for improved ergonomics
- Forged aluminum full hard anodized reel foot and reel clamp
- Machine-etched marlin logo on left side plate
- Precision placement of drain holes maximizes water removal from reel
- Special screw ports around side plate screws reduces water/corrosion buildup

**CONVENTIONAL TROLLING**

**MAKAIRA SEA SILVER**

The silver etched yellowfin tuna glistens as bright as the sea on top of the matte black anodized aluminum frame. This reel is as smooth as it is sleek with its Carbonite Dual Force drag system and its helical-cut gears. It's oversized handle and lower low-speed gearing versus the original Makaira serve up extreme torque for the Makaira SEa.

**FEATURES**

- Forged aluminum, machine-cut body & sideplate
- Cyclonic Flow Rotor
- Forged stainless steel main gear for ultimate power and strength
- Precision machine-cut 17-4 grade stainless steel pinion gear
- Oversized 17-4 grade stainless steel spool shaft reduces flex
- Hydro Sealed Body and DFD system for maximum protection
- Carbonite high-output drag with Cal's drag grease on full DFD
- Customized pre-set drag system, works like a lever drag reel
- 9HPB + 1RB corrosion-resistant stainless steel bearings
- Dual anti-reverse system for maximum strength and reliability
- Quick-Set stainless steel German anti-reverse roller bearing
- CRC: Corrosion-resistant coating process
- Machined aluminum, 2-tone anodized spool with LCS lip
- Machined aluminum screw-in handle arm for added strength
- Right and Left handles are designed differently: Order by Rt/Lt
- Heavy-duty, solid aluminum bail wire with manual trip function
- Rotor brake system works in conjunction with manual bail trip
- Machined aluminum handle knob: Custom options available

# SOLTERRA B

Built to battle the strongest of fish, the Solterra SLX B is the new generation of the acclaimed Solterra saltwater trolling reels. Armed with thrust bearings, the Solterra SLX B withstands tremendous side loads and allows you to crank the handle with reduced resistance when under pressure. The modern finish perfects the performance-packed reel.

FEATURES

- Stainless Steel Main Gear, Pinion Gears & Shafts
- Carbonite Drag System with Cal's Universal Drag Grease
- Double Dog Silent Anti-Reverse on All Models
- Stainless Steel Body Armor Reduces Frame Flex (20-50W Models)
- Thrust Bearings Help Reduce Handle Turning Resistance

# CORTEZ

Okuma Cortez star drag reels bring light tackle performance to a whole new category of anglers. Drop down gearbox, swept in handle and Ergo Grip handle knob accentuate balance and delivery of power from the XL gearing, anodized machined aluminum spool and multi-disc Carbonite drag system. Graphite frame and side plates maintain a feather light feel and balance while increasing corrosion resistance.

FEATURES

- Corrosion resistant graphite frame and sideplates
- CZ-55W features aluminum frame and graphite sideplates
- Machined aluminum, anodized spool
- Multi-disc Carbonite drag system
- Forged aluminum, anodized star
- Anodized aluminum swept handle reduces wobble while cranking
- 4BB+1RB stainless steel bearings
- MCS: External magnetic cast control system on 5CS, 10CS and 12CS sizes
- Ergo grip handle knob
- Dual anti-reverse system (mechanical & roller bearing)
- XL Gearing: Drop down gear box
- Quick-Set anti-reverse roller bearing
- MSS: Mechanical Stabilizing System for increased durability
- Self-lubricating gear system, all models

**CONVENTIONAL TROLLING**

**COLD WATER**

Serving anglers with a premium line counter reel in both right and left hand retrieve, Okuma proudly introduces the Cold Water. The Cold Water family is constructed upon a powerful star drag foundation including heavy-duty machine-cut brass gears, dual anti-reverse systems and full Carbonite drag system with up to 20-pounds of maximum drag output. The custom line counter includes new Okuma anti-fogging Clear View Technology, and should the counter be overwhelmed by water, an access port allows the interior to be dried completely. The line counter's reset button has also been recessed and placed on the side of the unit to eliminate errant resets. The series includes four sizes in right hand retrieve, three in leaving anglers with a premium line counter reel in both right and left hand retrieve.

**FEATURES**

- Lightweight corrosion resistant frame & sideplates
- Multi-disc, Carbonite drag system
- Aluminum handle arm with Ergo grip handle knobs
- 2BB + 1RB Stainless steel ball bearings
- Quick-set anti-reverse roller bearing
- Oversized machine cut brass XL drive and pinion gears
- Self-lubricating gearing system, all models
- Speed Lock pinion gear system, all models
- Machined aluminum, two tone anodized spool
- Dual anti-reverse system. (Mechanical and roller bearing)
- Mechanical line counter function measures in feet
- CVT: Clear View Technology anti-fogging line counter
- Aluminum ratcheting drag star for precision drag settings
- Wide Mouth levelwind: Clearance for copper lines
- Automatic trip spool engaging mechanism
- MSS: Mechanical Stabilizing System for increased durability
- DLX represent left hand crank line counter models

# CONVECTOR

Okuma Convector Low Profile Line Counter Reel features mechanical line counter with anti-fogging clear view technology, and equips with A6061-T6 machined aluminum, anodized spool, quick drop system. The reel is available in both right and left hand retrieve to serve all anglers.

FEATURES

- Precision machine cut brass main and pinion gears
- Mechanical line counter function measures in feet
- CVT: Clear View Technology anti-fogging line counter
- 2BB + 1RB stainless steel bearings for long last performance
- Automatic trip, spool engagement mechanism
- A6061-T6 machined aluminum, anodized spool
- Multi-disc high output Carbonite drag system
- Dual anti-reverse for maximum reliability
- Synchronized levelwind optimized for braided line
- Quick Drop, switch for precision lure/bait placement
- Available in both right and left hand retrieve
- On/Off clicker perfect for all trolling applications

# CLASSIC PRO XPD

Okuma Classic Pro XPD line counter reels feature strike zone line counter system incorporates a mechanical counter that precisely measures line based on spool revolutions. The speed LOC pinion gear system allows positive engaging at extreme high speed

FEATURES

- Lightweight corrosion resistant frame and sidelates
- Machined aluminum, anodized spool
- Stainless steel reinforcing sideplate rings
- Mechanical line counter function measures in feet
- Multi-disc Carbonite drag system
- 2 Stainless steel ball bearings
- Durable machine-cut brass gearing
- Ergo Grip handle knob with anodized aluminum handle arm
- Self lubricating gear system, all models
- Stainless steel level-wind line guide system

**CLASSIC PRO**

**NEW**

Coming from Okuma's best-selling series of conventional reels, the Classic Pro is a true saltwater workhorse. Designed for trolling in the Atlantic and Mediterranean waters, the Classic Pro's strength is rooted in its durable aluminum spool construction. The 2-bearing drive system and multi-disc carbonite drag system run smooth, and when fighting a fish, the oversized Ergo Grip handle knob increases cranking power. Straight to the point, with no extra gimmicks – the Classic Pro delivers reliable performance with an exceptional price-quality ratio.

**FEATURES**

- Lightweight corrosion resistant frame and sideplates
- Machined aluminum, anodized spool
- Ported graphite frame design
- Stainless steel reel foot for strength
- Dependable multi-disc Rulidium drag system
- Classic Pro XP features 2 ball bearings
- Machine cut brass and stainless steel gearing
- Aluminum power handle with T-style knobs
- Self lubricating gear system
- C version features an open structure for better cast control

**CONVENTIONAL JIGGING**

**CAVALLA**

The Cavalla 2-Speed Lever Drag reel is a compact-bodied machine built to handle the toughest of conditions. This reel is built with 6061-T6 machined aluminum frame and side plates. The rigid 1-piece frame continues around to the non-handle side plate. This rigid frame combined with a cold forged, type-II anodized machined aluminum spool give you a sleek and rugged weapon. The Cavalla reels feature a battle-proven carbonite drag system with Cal's drag grease that puts out 24 to 34 pounds of drag at full. The 17.4 grade stainless steel main and pinion gear as well as the CRC: Corrosion Resistance Coating process make this reel virtually corrosion resistant. Add to that 4 corrosion-resistant stainless steel bearings and a silent retrieve system for complete smooth operation. The Cavalla 2-speed reels feature a 6.4:1 and 3.8:1 gear ratio on the 5 size reels and a 4.7:1 and 2.1:1 gear ratio on the 12 size. Both the 5 and 12 size reels come in left and right hand retrieve and feature an on/off bait clicker. This reel is compact and comfortable, and features an Ergo Grip handle knob and anodized aluminum handle arm.

**FEATURES**

- Rigid 1-pcs frame and left sideplate construction
- 6061-T6 Machined aluminum frame and sideplates
- 17-4 grade stainless steel main and pinion gears
- Carbonite drag system with Cal's drag grease
- Cold-forged, Type-II anodized, machined aluminum spool
- Cold-forged, Type-II anodized, machined aluminum spool
- CRC: Corrosion-Resistant Coating process
- 4 BB corrosion-resistant stainless steel bearings
- Ergo Grip handle knob with anodized aluminum handle arm
- Silent retrieve system for cranking smoothness
- On/Off bait clicker for all lever drag models

**CAVALLA BLUE**

Your guide to the deep blue, the Cavalla Blue lever drag reel covers a whole range of sea fishing, from vertical jigging to casting, trolling, and fishing with live bait. To handle the strength of species like the sailfish and yellow tuna, the Cavalla Blue is built with a rigid one-piece aluminum frame and side plate construction. The Corrosion-Resistant Coating process increases the reel's resistance against the elements.

**FEATURES**

- 6061-T6 Rigid Aluminum Frame & Side Plates
- Carbonite Drag Washers with Cal's Drag Grease
- Cold-Forged Type-II Anodized Machined Aluminum Spool
- 4 HPB Corrosion-Resistant Ball Bearings
- On/Off Bait Clicker
- CRC: Corrosion Resistant Coating Process
- 17-4 Grade Stainless Steel Main and Pinion Gears
- Silent Anti-Reverse System for Smooth Cranking
- Additional Stabilization Plate for Anti-Reverse

**RODS**

# ROD TECHNOLOGY

## UFR TECHNOLOGY

When choosing a rod, anglers often face the trade-off between a powerful but bulky rod that can catch big-sized fish, or a sensitive but weaker rod that can sense the bites of the smallest fish. We address this challenge with a revolutionary tip: Ultimate Flex Reinforcement (UFR), which redefines the future generations of rods.

Developed using a patented manufacturing process, the UFR tip combines strength and agility like never before, marking a breakthrough. Our UFR technology endows our rods with a 300% increase in lifting capability and an ability to bend up to 360°. With a longitudinal fibers around the rod blanks, our rods are more powerful, yet lighter and more flexible than traditional ones. As a result, our anglers no longer need to choose between power and sensitivity.

**FREEING  
ANGLERS FROM  
THE CHOICE  
BETWEEN POWER  
AND SENSITIVITY**

## UMR TECHNOLOGY

Okuma's Ultimate Matrix Reinforcement (UMR) technology maximizes rod strength while minimizing weight, so you can rise to meet any challenge.

**LIGHTWEIGHT STRENGTH  
BUILT FOR ANY CHALLENGE**

## USR TECHNOLOGY

Okuma's USR technology, short for Ultra Strength Reinforcement, is an innovative carbon fiber wrapping technology for fishing rods. By utilizing a cross carbon wrap jacket, USR significantly enhances the performance of rod blanks. This advanced construction technique reinforces the structure of the blanks, resulting in increased strength and amplified power. With USR, fishing rods achieve a superior level of robustness and improved performance capabilities.

**ROBUSTNESS AND  
IMPROVED PERFORMANCE**

Guide Select

# CAST WITH CONFIDENCE

Okuma's Guide Select series covers a range of fishing techniques with professional-level performance provided by carefully selected components. From blanks with high-quality Japanese carbon and Okuma's UFR® tip technology to Sea Guide® line guides, the Guide Select Series is for those who want the equipment specifically designed for their style of fishing.

**SPINNING**

**GUIDE SELECT VERTICAL SPINNING**

The Guide Select Vertical Spinning rods are developed for vertical fishing. The rod blanks are shorter than average due to the fact that long casts are not in the center of this fishing style. In addition to this, shorter rod is easier to handle in the boat. Vertical Spinning has a sensitive tip yet enough power. This allows you to feel even the most sensitive strikes and hook the fish.

**FEATURES**

- 30t and 30+40t carbon
- Seaguide SS with Zirconia insert
- Fuji VSS reel seat for spinning
- Fuji TCSM reel seat for casting
- UFR Tip technology
- Premium EVA Grip

**SPINNING & CASTING**

**HELIOS SX**

The Helios SX rods were designed with the latest technology and insight from leading bass anglers. The backbone of the Helios SX rods is the ultra-responsive and durable 30-ton carbon blank construction. This 30-ton carbon construction gives these rods the sensitivity you need to feel each bump and tick as you retrieve your bait. The Helios SX rods bring their lightweight technology into twelve key spinning and baitcast models. With five spinning models from 6-foot 9-inches to 7-foot 2-inches and light to medium heavy actions, they have you covered in your drop shop or other key spinning applications. The series also has seven casting models from 7-foot to 7-foot 6-inches and medium to heavy actions.

**FEATURES**

- 30T carbon construction
- Slim blanks with fast action
- Japanese split EVA handles
- Ergonomic touch blank screw-up reel seat
- CCS SIC Gunsmoke guides
- Customized Okuma butt cap
- Delivered in cloth bag

## 8K FEEDER

Introducing the second generation of our highly acclaimed 8K Feeder rod series, where we've taken the best features of the previous generation and elevated them with unique upgrades. Crafted with precision, each rod in the 8K Feeder 2nd generation series boasts a high module carbon construction, ensuring exceptional strength and durability without compromising on responsiveness. The thin blanks enhance overall performance, allowing for enhanced sensitivity. We are proud to present the innovative 'Sniper' tip design incorporated into every rod in the range. These detachable tips offer unrivaled sensitivity for bite detection, allowing you to increase your catch rate. Prepare to elevate your feeder fishing to new heights.

### FEATURES

- High module carbon
- Thin blanks
- Fast response
- Supplied with 3 Innovative detachable 'Sniper' tips
- Sea-guide high quality components

MATCH/FEEDER

NEW

## CUSTOM BLACK FEEDER

The next chapter of the Custom Black Feeder success story is here. Dedicated to delivering uncompromised and versatile performance for match and feeder anglers, the new Custom Black Feeder builds on the best-proven features of the series – and adds in a brand-new rod tip design. The series' thin high-modulus blanks pack enough power for long and accurate casts, but also deliver the fast and responsive action needed to land in species like carp, bream, and barbel. Finished with top-of-the-line cosmetics for that Custom Black Feeder look.

### FEATURES

- High module carbon
- Thin blanks
- Fast response
- Supplied with 3 Innovative "Fishery" tips
- Unique ergonomic shaped handle for comfort
- High quality components
- Ergonomic rear grip

TELE SURF

NEW

# DISTANCE

A member of Okuma's new range of surf casting rods, the Distance rod allows you to reach the faraway spots where the big ones lurk. The telescopic spinning rod is easy to store and carry, making it an ideal choice for the mobile angler with a preference for convenience. The Distance rod features a premium Fuji reel seat, a hybrid tip to increase bite detection, and a high-modulus carbon wrap to increase the blank's strength and sensitivity. The floating heavy-duty line guides increase performance and allow the rod to telescope smoothly.

FEATURES

- High module carbon wrap
- Fuji reel seat
- Heavy duty sliding guides
- USR

BOLENTINO

NEW

# AVENGER PRO BOLENTINO

Designed for saltwater bottom fishing from the boat, the Avenger Pro Bolentino relies on a powerful and balanced high-modulus carbon blank and the sensitivity of the hybrid tip. All rods in the series come with a two different hybrid tips – you can adjust the action when needed by changing the tip. And when fighting the fish, the fighting butt cap allows you to brace the butt against your body for increased leverage. The Avenger Pro Bolentino series includes two 2-part rods and a telescopic version with an interchangeable hybrid tip. All finished with adrenaline-fueled cosmetics.

FEATURES

- High module carbon
- Powerful and balanced blanks
- Supplied with 2 detachable Hybrid tips
- Fighter butt cap
- Telescopic version in 310cm rod

## TROLLING

## COLD WATER IN-LINE

Designed for freshwater trolling, the Okuma Cold Water inline rod's moderate action and powerful and responsive 24-ton carbon blank are optimal for targeting agile and vigorous fish like salmon. The inline design of the Cold Water allows for a flexible structure with an even distribution of force when fighting the fish. The high-quality tip guide line material ensures the line endures stretch and stress without breaking.

## FEATURES

- 24T Carbon Blank
- Fuji® DPS Reel Seat with Aluminum Double Lock
- Premium EVA Grip
- Anatomic Front Grip
