This landing net, designed for trout fishing can be hung in the back, on the jacket or on the vest using a magnet. This one is more versatile than a classic trout net since it has a longer handle which is particularly convenient when it is not possible to fish in the water or it is necessary to exhaust a fish from the top of a low wall. As such, it is also ideal for streetfishing above the docks. The handle folds over the head to reduce the clutter, so that it is forgotten in the back of the fisherman in fishing action. The opening system is very convenient and can be handled with one hand to dry your sockets safely. The rubber net allows a better respect of the fish and a faster drying to avoid bad smells in the trunk of the car! The handle ends with a magnet and a long elastic to secure the dip net during the fishing game.

MYSTIC pastes are easy to assemble and hold well to the hook, they do not flow and are indissoluble in water. Not perishable, cap well closed, they can be kept very long. Can be used alone, or mixed with other baits (excellent result on worms, maggots, etc ...).  
At the origin of the invention and 60 years later, the little red tube is still the favorite of fishermen. Of formidable efficiency alone or in variegated, it is of course the tube that must have in his basket seat. Yellow is ideal for imitating corn grain, wheat grain, cheese etc. With white, you will easily replace maggots, rice grain, bread crumbs etc. Finally, the green is it for a specific fishing: fishing Foam.

# FIT JIG

The Fit Jig has been designed to meet the requirements of fishing in the Atlantic and Mediterranean. Ideal for precision fishing where you need to position the lure close to a wreck or shoal of fish. The Fit Jig butterflies in the first few meters and then enters into a quick descent to reach the desired fishing area. This attribute makes it possible to get as close as possible to the preferred position. Once the lure has arrived at the desired location, it is during the retrieve that it excels as it rises quickly like a fish trying to escape for 5 to 6 meters, creating lot attractive and erratic movement. An asymmetrical body design, one face with a curve and scales, whilst another face angled and smooth, is the key to the lures action. Armed with an ASSIST HOOKS and a single VMC hook 7117 TI, the FIT JIG has proved very effective on various marine species, when either boat fishing or from the shore.

The FAT JIG as the name suggests was designed to be heavy or rather compact! The Rapot range of spoons and Jigs is comprehensive, but to complete it, it was necessary to think «density». Designed as a dense yet compact lure, the FAT JIG casts very well, provide formidable efficiency to quickly reach the depths and is not too imposing to offer resistant in the current. Natural or Flashy colours and armed with an assist hook and a simple in-line, the FAT JIG proved during the tests to be a formidable weapon on all our marine predators, especially Plaiice and Bass.

This is a «UNIQUE» model of Tenya, technical for experienced anglers, but also versatile for all other anglers looking for beautiful fishes and new sensations! Assets : Shoe shape : offer very good stability whether it is used in a free descent (i.e. open pick-up and let it go down) or in a controlled descent (let the line slide between the fingers to slow down the descent slightly). It will always land perfectly on the ground, «Beak» shape : allows it to make small jerks when the angler wants to without hitting the bottom and remaining as natural as possible, as if the shrimp were making a small jump to move, Noisy beads : emission of high and low frequency sounds triggers the curiosity or irritation of the fish and awakens their aggressiveness, Attractive foam : allows the bait to be diffused, making the fish less wary of the bait because it looks more real. The fish will be more determined and have a better grip on the tenya, Armament : main hook and double hook set-up, Eye signal : to enhance the attraction.

# CIVELIX®

The integrated lead head allows fishing instantly without adjustment.

In fishing, the oscillation of the head of the Civelix® opposite the beats of the tail, causes an energetic serpentine movement. It focuses powerful vibratory waves that alert predators.

Filiform shape with an arched cross profile.

**SWIMMING ACTION**

**PW** - Pearl White ; **SG** - Silver Gold

The Civelix® is the perfect imitation of a glass eel (pibale), favorite prey of carnivores. It is very formidable to throw the edge or the boat, the zipper, the bombette or the troll.
