RAGLOU® HYBRID

NEW
COLORS

This RAGLOU® HYBRID version combines a leaded head and the body of the traditional RAGLOU®. This lure can be used behind a Buldo, like its predecessors, but especially on its own either casting or vertical fishing. It works well around underwater features using a linear retrieve. Built using VMC 9255 TI hooks for the ultimate in sharpness and strength. A wide choice of sizes and colours including the realistic AYU, BM and GM patterns and finished with 3D eyes.

ANGUILL® NORMANDE BRIGHT

For years, the artificial eel remains one of the most popular lures. Its profile is reminiscent of worms or small eels much sought after by bars and places.

- Arc provides the eel with a fascinating wave motion for predators.
- Tube made of soft rubber, strong and elastic.
- The «Brill», iridescent filament increases attractiveness.
- Cut and length bevel studied for a perfect balance

The Fit Jig has been designed to meet the requirements of Atlantic and Mediterranean fishing. Ideal for precision fishing where you need to position the lure close to a wreck or shoal of fish. The Fit Jig butterflies in the first few meters and then enters into a quick descent to reach the desired fishing area. This attribute makes it possible to get as close as possible to the preferred position. Once the lure has arrived at the desired location, it is during the retrieve that it excels as it rises quickly like a fish trying to escape for 5 to 6 meters, creating lot attractive and erratic movement. An asymmetrical body design, one face with a curve and scales, whilst another face angled and smooth, is the key to the lures action. Armed with an ASSIST HOOKS and a single VMC hook 7117 TI, the FIT JIG has proven its effectiveness on various marine species, when either boat fishing or from the shore.

FAT JIG

The FAT JIG as the name suggests was designed to be heavy or rather compact! The Ragot range of spoons and Jigs is comprehensive, but to complete it, it was necessary to think «density». Designed as a dense yet compact lure, the FAT JIG casts very well, provide formidable efficiency to quickly reach the depths and is not too imposing to offer resistant in the current. Natural or Flashy colours and armed with an assist hook and a simple in-line, the FAT JIG proved during the tests to be a formidable weapon on all our marine predators, especially Plaiice and Bass.

YANN®

Its unique and proprietary alloy produces highly attractive sounds, unlike traditional brass. The premium nickel plating delivers an irresistible shine. Featuring a curved and streamlined profile, its weight is evenly distributed along the body to enable long casts and a fluttering 'dead leaf' descent.

MYSTIC pastes are easy to assemble and hold well to the hook, they do not flow and are indissoluble in water. Not perishable, cap well closed, they can be kept very long. Can be used alone, or mixed with other baits (excellent result on worms, maggots, etc ...).

At the origin of the invention and 60 years later, the little red tube is still the favorite of fishermen. Of formidable efficiency alone or in variegated, it is of course the tube that must have in his basket seat. Yellow is ideal for imitating corn grain, wheat grain, cheese etc. With white, you will easily replace maggots, rice grain, bread crumbs etc. Finally, the green is it for a specific fishing: fishing Foam.

Several colors and perfumes adapted to calm and common waters. For carp, tench, bream and all other white fish.

- Food quality.
- Exceptional pigmented colors.
- Holding the hook impeccable.
- Proteins and vitamins preserved.
- Sterilized packaging.
- Malignant lids to close the box during the fishing trip to preserve the seeds.

The Gyro is a hi-performance blended, braided multipurpose line made with HMPE fibers. It is a sinking line with near zero stretch ratio. It has good breaking resistance and excellent diameter to strength ratio with most commonly used knots. Can be used as mainline for casting, carp fishing, feeder fishing and boat fishing.

Reinforced braid extremely resistant to abrasion and friction.

- Perfectly suited for the bottom of the line, but also for making dead manic frames or custom frames. (Triple mounting on lure for example).
- An essential product that must be part of your equipment because it is limitless and indispensable in the face of an opponent of size for which you must be "armed".

Visibility, buoyancy and sensitivity, 3 essential qualities for our Saône float.

A light body, an elongated shape and a rather low waterline gives it excellent visibility at distant fishing distances or in strong winds.

- Its tapered shape allows it not to suffer too much resistance to penetration into the water during a shy touch.
- Very versatile, this float is powerful in all seasons and for all situations (earthworms, live, edge, boat, drift or fixed, in strong or weak currents, ...).

Here is one of the key elements in catfish fishing: the hook. This one is subjected to hard tests, friction, wear, very important traction exerted by very powerful fishes... For this reason CAT SPIRIT chose to propose to you VMC hooks combining all the qualities required to face the biggest catfishes:

- Extremely resistant to opening or snapping.
- PTFE coating (polytetrafluoroethylene) for faster penetration and reduced visibility.
- Ultra-sharp ground point.

REAL SIZES

Originally developed for the Jigging, the 7264 VMC has an ultra-sharp ground tip, black Nickel coating, forged and reinforced opening strength. It is a simple hook, yet highly effective with super strong construction, extra wide gape and short shank making it ideal for avoiding the hook opening mid-battle. The design also provides better bait mounting :
 - To hang a live through the mouth without injuring it too much and to keep it alive optimally on the frame by gluing the muzzle as close as possible to the lead
 - To avoid with its short stem the tears caused by repeated movements which are amplified with a shank too long and therefore acting as a lever
 - Even if it is not necessarily intended to sting the predator, its very rounded and wide shape, combined with the extreme sharpness, facilitates penetration on hesitant fish that don't get hooked on the treble
 - The 7264 is also perfect for creating a hair mount for pellets or even just for fishing with natural baits

The 8626 is a triple hook with unparalleled versatility, reinforced (3X), just enough to cope with most fights, but not too much and therefore makes it suitable for many uses:

- change the triple hooks tired of your lures or replace others not sufficiently adapted and too fragile on fish swimmers, it is perfect to arm them properly without creating too much imbalance,
- reduces the damage to livebaits compared to a thicker gauge hook.
- delicately bunch a bunch of Canadian earthworms on a clonck mount ...It is the product that meets the requirements of our techniques in 80% of cases and the ideal tool suitable for most of our French rivers.

The FIRE BALL ROTATIVE CAT SPIRIT is composed of a head in which is drowned a single hook reinforced 8357 PTFE VMC.

- The space intentionally short between the lead and the tip of the hook has the main imperative to allow a clamping of the live very close to the lead, limiting the tears due to repeated animations.
- Improvement requires, rolling also partly embedded in the mass of the lead is located on the upper part and considerably limits the twisting of your line body.
- The lower eyelet in stainless steel allows to fix a stack armed with a second triple hook at the back of the live.
