MATERIALS AND FINISHES

BALSA WOOD

Balsa wood has always been the material of choice for Rapala's iconic lures; such as the Original Floater and Countdown – the lures that started it all. Even today, a precisely shaped and precision weighted balsa body gives the lure the most responsive and life-like action, unachievable with any other material. Balsa wood is quite unique; it is a very sustainable product thanks to its rapid growth rate, and despite being so light it is still very strong and is classified as the softest commercial hardwood – the perfect initial ingredient in creating the famous Rapala "wounded minnow" action.

ABACHI WOOD

Abachi wood is the perfect choice for Rapala when a tougher wooden lure is required. Abachi is used in the manufacture of Rapala lures such as the Countdown Magnum – lures that are designed to target big fish. Abachi offers a similar life-like, natural swimming action to balsa. The major difference between abachi and balsa is the strength and also the buoyancy; balsa has higher buoyancy and will rise faster in the water than abachi.

PLASTIC

Plastic is the great artificial material for manufacturing fishing lures, it lends itself to a variety of options for finishes and translucency. Plastic is ideal for lures that have to be very strong and durable or neutrally buoyant (suspending). Plastic lures can be built to be as noisy as a swarm of bees or as silent as a mouse. Translucent plastic can have texture on either side, allowing very realistic life-like finishes with 3D scales, lateral lines, gills and fins when combined with internal metallic or holographic finishes and external paint and print patterns.

ORIGINAL RAPALA FOIL

Rapala's original foil is the perfect all-rounder when it comes to selecting a general purpose finish to mimic natural baitfish. The original foil produces a moderate amount of flash and showcases a fantastically detailed, natural scale pattern.

PAINTED & PRINTED

Painted and printed finishes are generally found on wooden bodied lures, such as the Countdown and Original Floater. These color combinations give off a low amount of flash, and can be produced to provide either natural or high contrast attractor patterns.

HOLOGRAPHIC FOIL

The holographic foil is a signature ingredient within the X-Rap concept; it is what gives that strikeinducing flash that fish just can't resist. Holographic foils are used both internally and externally to achieve intense flash that still blends into the natural underwater environment.

METALLIC PLATING

Metallic finishes are used to imitate really shiny baitfish species and to create a lot of flash to catch the fish's attention. Combined with paint and print patterns, chrome finishes can be used to create highly detailed baitfish imitations as well as bright and flashy attractor patterns.

CUSTOM HD LIVE

Created in perfect detail, the advanced Custom HD finishes are the most life-like replicas of nature ever. The artisanal finishes are a mix of modern printing technology combined with classic Rapala foil finishes and deep knowledge on how to combine the best of both to create stunningly beautiful baitfish imitations.

GILDED FINISH

In nature, numerous baitfish open their mouth wide open when feeding, allowing their gills to reflect light in a shiny, metallic flash. The gilded finish replicates that flash with an added metallic finish on the lure's head – resulting in a polished yet life-like design.

UV BRIGHT

It is widely understood that many fish species see into the UV spectrum, which aids in hunting prey. Some of our lures are coated with UV reflective particles which greatly enhance their visibility to predatory species. UV light is invisible to most humans, so you'll just have to try a UV BRIGHT lure and experience the results first-hand.

GLOW

Glow colors reserve light energy into the coating and release it in the dark – be it because of night or deep water – to create an irresistible target for the predators.

PRECISION XTREME PENCIL

Precise Design – Xtreme Action! Inside the Precision Xtreme Pencil's durable and through-wired plastic body is an internal weight system that makes the lure one of the best-casting baits in its category. The internal weight doubles as the Dual Frequency Knocker: as the weight slides along the internal railing, it hits a durability-increasing plastic pillar and a stainless-steel weight in turns. This results in a sequence of high and low pitch, attracting fish from near and far! The extremely detailed Precision Xtreme Pencil features printed scales, a new 3D holographic eye, and comes in 13 fish-catching freshwater colors.

Premium balsa, fish-catching action on both casting and trolling, and a natural baitfish profile – given the Elite treatment! The Shad Rap Elite builds on the well-proven qualities of the immensely popular Shad Rap® crankbait and pairs it with modern wire-through construction in the body for maximum casting distance and durability. SOFT OLIO

If you didn't believe in monsters, now's a good time to start. A relative species to the Peto and Otus, the Soft Olio builds on the well-proven side-to-side rolling action – and adds in the irresistible display of the curly twin tails. Designed for targeting large predators in various situations, the soft bait maintains its action in slow retrieves and can be rigged for optimal presentation. When paused, the split tail flutters enticingly as the lure slowly swims into the depths. Thanks to the soft plastic construction, the Soft Olio's textured body provides increased vibrations in the water.

SUPER SHADOW RAP GLIDE UV HOOK

The pike favorite has learned new tricks. The Super Shadow Rap Glide swims in a fish-catching S-pattern, but that's just the start. When you need to adjust the swimming depth, the revolutionary Screw Diver System allows you to modify the lure's weight with changeable tungsten weights. Simply screw it on and off! The master of adaptation, this jointed swimbait comes with a spare tail, allowing you to choose between life-like and aggressive colors. On steady retrieves, the Super Shadow Rap Glide gives off a slow S-pattern swimming action – with twitching, the lure swims with short turns. And when the fish is on, the swiveled hooks increase your chance of landing your catch. Extra Screw Diver System weights sold separately.

SHADOW RAP® SHAD

Big fish can't resist the tantalizing, slow-rising action of the new Shadow Rap® Shad. Swimming with the infamous horizontal struggle with a vertical "rise" on pause, they perfectly mimic a shad in trouble. Larger profile presents more flash and the option to fish from a finesse to more aggressive retrieve. Tie one on and see what monsters are hiding in the darkness.

Textured Scale Body • Translucent & Frosted Colors • Sharp Left to Right Turns • Slow Rising on Pause • Casting • 0.9-1.2 m Depth • Multi-Species Gamefish • VMC® Thin Wire Black Nickel Round Bend Hooks

SHADOW RAP® SHAD DEEP

The Shadow Rap® Shad Deep breaks the mold. Fish it finesse in the morning when the big ones are still a little sleepy, then ramp it up all the way to an aggressive action, matching the mood of the fish. The revolutionary new "frosted" colors absorb light and minimize flash, just right for an enhanced absence of aggressiveness.

CASTING

X-RAP®

The X-Rap® is “all about the action.” It’s the perfect size, shape and 3D illusion of a minnow. Prominent scales and lateral line on the fuselage capture and flash light like a beacon. It can be fished both in an aggressive “Slashbait®” technique or with a classic Rapala wobble. The angler defines the cadence for maximum effectiveness. Small versions of the X-Rap® are ideal for targeting smaller species – or as small, snack-sized offerings for big predators that are finicky and won’t bite bigger lures.

Slashbait® Action • Suspending on Pause • Textured Translucent Body • Internal Holographic Foil • Internal Long-Cast System (XR04 excluded) • 3D Holographic Eye • VMC® Black Nickel Round Bend Hooks • Flash Feather Teaser Tail • Hand-Tuned & Tank-Tested

Fish the Xtreme Attitude consistently at any depth. Based on the Countdown® method introduced by Rapala in the 1960s, the X-Rap® Countdown® brings modern X-Style finishes and details to the game. It swims with a strong rolling action and flutters down on the pause. The X-Rap® Countdown® sinks 30% faster than the classic CD. Due to its weight and body design, it is also very long casting.

X-RAP® POP

This X-Rap® brand, lure surface version, "pops" and "splashes" in a remarkable way thanks to its arched back. The concave shape of its mouth creates a string of bubbles imitating the sound of a fish hunt, when animated by dry drawing. Very easy to animate, the slightest movement gives it life. It is as effective in freshwater as in the sea, for example to fish for bass in oyster beds.

CASTING

X-RAP® MAGNUM® XPLODE

The over-engineered X-Rap® Magnum® Xplode combines a heavy through-wire construction with a thick-walled ABS body, giving it Rapala's Magnum level of strength to absorb the most vicious strikes. A low positioned tow point pulls the popper downwards, keeping the X-Rap® Magnum® Xplode stable in all weather conditions; while its deep cupped face generates a thunderous surface explosion with each sweep of your rod.

Through-Wire Durable ABS Body • 3D Holographic Eye & Internal Foil • Explosive & Loud All-Weather Stable • VMC® 75 Series™ 6X Tropic Spark Point • Floating

FLASH-X DART

CAST, RETRIEVE, PAUSE, STRIKE! - The wired-through Flash-X Dart is heavily weighted to cast farther than other lures in its class. Thanks to its prismatic design, the lure sinks with a side-flashing fluttering action on the pause and remains stable when retrieved at high speed. This unique shape makes the Flash-X Dart catch and reflect light like a mirror ball, attracting fish from a wide area.

Designed for Long Casting Distance • For Saltwater Predators • Side-to-Side Darting Action • Sinking, Flutters on the Drop • Durable Wire-Through Construction • Lead-free • Plastic Body with Metalized Coating for Extreme Flash • Unique Prismatic Design • Premium VMC® 7556 3X Ti-Coated Treble Hooks • Sinking

FLASH-X EXTREMO

Built with Rapala's MaxCast system, the wired-through Flash-X Extremo gets you closer to those distant fish. When you begin your retrieve, the MaxCast tungsten balls shift to the head, enhancing the lure's rolling (and flashy!) action. Jerk it aggressively to imitate a distressed baitfish or crank it fast with a pause in between to entice a bite.

FLASH-X SKITTER

Built to soar and skitter, the wired-through Flash-X Skitter perfectly mimics one of the most hunted saltwater baitfish in the ocean – the needlefish. The tapered prism design creates impressive flash above and below the water while also acting as a keel to improve stability during a high-speed retrieve, keeping the head up. Crank it fast to send it skittering across the surface like an escaping fish that no predator can resist.

Designed for Long Casting Distance • For Saltwater Predators • For Aggressive Retrieves • Floating • Skittering Topwater Swimming Action • Durable Wire-Through Construction • Lead-free • Plastic Body with Metalized Coating for Extreme Flash • Unique Prismatic Design • Premium VMC® 7556 3X Ti-Coated Treble Hooks

CASTING

RIPPIN' BLADE

A cross-over between a blade bait and the Rippin' Rap, the Rippin' Blade delivers versatility and performance in one mean-looking package. Designed to excel at both casting and vertical jigging, the Rippin' Blade has three attachment points to modify the swimming action to suit the situation. The heavy and slender-profiled lure falls upright and gives off intense vibrations – even at slow speeds. When jigged, the fast-sinking lure gives off a tight side-to-side action.

Tie on the Rippin' Blade when going after big fish, in open water or through the ice.

Instant Tight Vibration on Lift or Retrieve • Three Line Tie Holes • Long Casting • 3D Holographic Eyes • Metal Frame with Durable Plastic Body • Tungsten Belly Weight • VMC® snap • VMC® 5541 BN Treble Hooks

X-LIGHT MINNOW

The new standard for modern ultralight baits. The X-Light Minnow features an upgraded weight distribution for casting the miniature lure into the far-off spots. And when the lure hits the water, the showdown begins. The slow-sinking X-Light Minnow swims with a perfectly rolling and kicking swimming action, even in slow retrieves. Thanks to the L-shaped diving lip, the lure retains the action also in heavy currents – making it an excellent choice for fishing streams.

X-LIGHT POP

Light in weight – big in pop. The X-Light Pop is the topwater snack every small predator fish has been looking for. The aerodynamically designed lure casts far into the distance and returns with loud, pronounced pops. The effect is amplified by the lure's internal rattle. The modern life-like finishes and teaser tail make the X-Light Pop a bite that small predators will find hard to resist – especially when the bite is finicky.

NAUVO

A classic restored – the Rapala® Nauvo brings a modern update to a tried-and-trusted traditional metal spoon. Originally appearing in the 1990's, the Nauvo swims with a life-like wide tail wagging action on a steady retrieve while a faster retrieve adds irregular kicks into the action, breaking the rhythm and adding flash. The fluttering and rolling action on the drop adds additional attraction. Modern finishes combine updated traditional spoon colors and realistic HD baitfish patterns. Available in two sizes: the bigger option is perfect for targeting larger predators while the smaller all-rounder is well suited for trout and salmon.

FLOAT TUBE

FLOAT TUBE FT 100

The FT100 is the lightest in the range, ideal for beginner anglers. Its light weight makes it possible to travel light to get into the water in the most remote spots and catch fish that never see a fisherman! It has wide pockets open by a zipper along their entire length, allowing them to slide the boxes of lures very easily. A bar at the front, associated with a net, is a rigid workspace and large enough to redo the rigs, change lures and pick up the fish. At the front, there are also Velcro on the tubes to secure the canes during travel. The high-density floating foam seat and backrest make it easy to spend a day fishing as in an armchair. At the back, a net allows to evacuate the water quickly when it is necessary to leave the Float Tube of the water. It is possible to attach rod-type accessories to the side of the tubes with the rings attached to the pockets. Under the Float Tube, there are eyelets and straps that can be worn on the back, and a handle.
