WITH SUFIX®, THERE'S NOTHING YOU CAN'T CATCH.

12+1

12 carrier UHMPE braided line wrapped around a single-strand GORE® Performance Fiber for optimal roundness and reduced internal abrasion.

R8 BRAIDING

Tightly weaved consistency of 8 fibers (carriers) provides lines with superior strength, roundness, and line consistency.

GORE® PERFORMANCE FIBERS

Gore® Performance Fibers improve abrasion resistance, increase durability, casting length/accuracy and knot resistance. This makes the braid become a sinking line.

WA BRAID

Wide Angle Braiding Technology that creates higher tension on the braiding process, resulting in a tight weave and super strong, silky smooth line.

PE WAX SHIELD

Proprietary wax coating for braided lines offers incredible toughness and abrasion resistance.

ADVANCED TEMPERING PROCESS

Custom tempering process for high viscosity nylon creates long molecular chains that give the line toughness and resilience, resulting in a very low stretch line without losing its strength and low memory properties.

HIGH TENACITY POLYESTER

Increases breaking strength and abrasion resistance while adding density for faster sinking speeds.

PRECISION WINDING / G2 PRECISION WINDING

Eliminates line memory and prevents line-weakening cutting and nicking that can occur during the spooling process.

DIGITAL Y6 BRAIDING

Braiding system with higher pic count that makes Sufix braids rounder and thinner.

UHMPE FIBER

Ultra High Modulus Polyethylene fiber. Extremely strong fiber used in premium braided lines.

SUPER BOND POLYMER TECHNOLOGY

10X SUPER TOUGH/15X SUPER TOUGH

Proprietary polymer technology that creates line abrasion resistance from 10X to 15X better than most nylon monofilaments in the same diameter.

J7 MICRO RESIN

Exclusive polymer resin that provides superior strength and toughness with easy casting.

PVDF FLUOROCARBON

Polyvinylidene fluoride with high specific gravity for fast sinking. Near zero reflection under the water makes the line nearly invisible to the fish.

CORONA FUSION COLORING TECHNOLOGY

Coloring technology that assures optimal color retention on the UHMPE fiber. Also maximizes the color intensity and brightness.

BRAIDS

BRAIDED LINE

131 G-CORE

Sufix 131 G-Core is the most reliable superline during casting, strikes and fighting action! It is built with 13 fibers (12 HMPE fibers + 1 GORE® Performance Fiber in core). A single strand of GORE® Performance Fiber is surrounded by 12 precision braided HMPE fibers. The construction has no weak points which leads to strength consistency. The GORE® Performance Fiber is the most abrasion resistant textile fiber. It is solid and round like a monofilament but has the same low stretch as the PE fibers. No more problems with gliding or knots opening! In addition, the 13-carrier construction increases the number of fibers at the knot resulting in better knot tying and stronger holding power. The structure of the Sufix 131 G-Core is much rounder than any other competitor's 12 or 16 carrier braid. The rounder line reduces the resistance in water (while retrieving) and the abrasion caused by rod guides and obstacles in the water. The core fiber (GORE® Performance Fiber) prevents the line from internal fraying making the line more durable. A rounder line casts farer, more silent and more accurate. The cancelled center hole does not allow water to enter – no water means lighter line and longer casting distances. The Sufix 131 G-Core is braided line that is great for casting and jigging, when you need a relatively thin line.

FEATURES

- Built with 13 fibers (12 HMPE fibers + 1 GORE® Performance Fiber in core)
- The most reliable superline
- Improved knot resistance
- Unmatched strength consistency and roundness

BRAIDED LINE

91 G-CORE

The Sufix 91 G-Core continues Sufix’s range of braid lines with ultra-reliable performance when casting and fighting the fish. With an abrasion-resistant GORE® Performance Fiber in the core and 8 precision-braided UHMPE fibers surrounding it, the 91 G-Core’s 9-carrier construction results in low stretch, better knot tying, and stronger holding power. The silky smooth 91 G-Core’s super-slick coating allows for long casting distance and superior sinking ratio.

FEATURES

- Built with 9 Fibers (8 UHMPE Fibers + 1 GORE® Performance Fiber in Core)
- Superior Sinking Ratio & Roundness
- Super-Slick Coating
- Low-Stretch

BRAIDED LINE

832 ADVANCED SUPERLINE®

Sufix 832 Advanced Superline® is the strongest, most durable small diameter braid. It is built with 8 fibers (7 HMPE plus 1 GORE® Performance Fiber) and 32 weaves (pics) per inch. Due to its high-pitch count, it is also hydrophobic (water-repellent). The R8 Precision Braiding and fiber technology provide superior strength, roundness and line consistency. By adding GORE® Performance Fibers we improve abrasion resistance, increase casting length/accuracy and reduce line vibration. HMPE fibers provide the high strength and sensitivity, hydrophobic water-repellent protection and small diameter. All of this makes Sufix 832 Advanced Superline® 30x more abrasion-resistant than other braids.

FEATURES

- The strongest, most durable small diameter braid
- R8 Precision Braiding and fiber technology provide superior strength, roundness and line consistency
- Constructed of 8 fibers (7 HMPE plus 1 GORE® Performance Fiber) and 32 weaves (pics) per inch.
- GORE® Performance Fibers improve abrasion resistance, increase casting length/accuracy & reduce line vibration
- HMPE fibers provide high strength & sensitivity, hydrophobic water-repellent protection & small diameter.

BRAIDED LINE

X8 BRAID

Sufix x8 is a round, easy to handle and silky-smooth Japanese-style braided line. It has an 8-carrier construction of thin HMPE fibers making it a super strong, thin line with high abrasion-resistance and superb knot and shock strength. The R8 Precision Braiding technology with a high-tension weaving process gives this line its distinct supple and smooth qualities that have consistent diameter and quality plus an excellent strength to diameter ratio. The materials and construction mean that the line has low friction when passing through the rod guides. This results in silent performance and long, accurate casts. Sufix x8 is designed for both casting and spinning reels. It is a great option for smaller lures, light soft plastics (jigging), perch, trout, rainbow trout and finesse fishing.

FEATURES

- 8-carrier construction (thin HMPE fibers)
- R8 Precision Braiding technology
- Round and smooth braided line
- Excellent strength to diameter ratio

BRAIDED LINE

NANOBRAID®

Strong and thin nanofilament braid. Sufix® NanoBraid® is built with a Wide Angle Braiding Technology that creates higher tension on the braiding process, resulting in a tight weave and super strong, silky smooth line.

The densely braided HMPE fibers and a high pitch-count - up to twice as high as on most braided lines - gives consistent quality, uniform diameter and increased abrasion resistance, improving the line's performance.

Sufix® NanoBraid® is up to three times stronger than other lines in the category and also features superior knot and shock strength unmatched by any other ultra thin line. The silky soft line is extremely sensitive and runs quietly through the guides.

BRAIDED LINE

GYRO

The Gyro is a hi-performance blended, braided multipurpose line made with HMPE fibers. It is a sinking line with near zero stretch ratio. It has good breaking resistance and excellent diameter to strength ratio with most commonly used knots. Can be used as mainline for casting, carp fishing, feeder fishing and boat fishing.

FLUOROCARBON

FLUOROCARBON

ADVANCE FC

Proprietary gel phase technology™ process produces the ultimate handling, performance and clarity essential to the most discriminating anglers. Maximization of the fluoropolymers through precision processing creates an easy handling, super-sensitive and abrasion resistant fluorocarbon.

FEATURES

- Supple
- Virtually Invisible
- Excellent Abrasion Resistance
- Top-Quality Raw Material for Maximum Strength
- Fast-Sinking
- Environmentally Friendly Packaging

FLUOROCARBON

SUPER 21® FC

100% fluorocarbon line is virtually invisible in the water and is ideal for stealthy presentations. Low stretch index improves line control, presentation and bite detection, and optimizes hook setting power. Extremely abrasion resistant and durable for fishing rough structure and for tough-mouthed fish, yet supple enough for subtle presentations. Fluorocarbon line sinks four times faster than traditional nylon lines allowing the presentation to sink to the strike zone faster. 100% fluorocarbon line that casts like a regular monofilament and offers exceptional handling on spinning & casting reels.

FEATURES

- Invisible
- Low Stretch
- Super Strong
- Fast sinking
- Easy Handling

MONOFILAMENT LINE

HX-MYTH

HX-Myth, revolutionizes the fishing experience as a super low stretch monofilament, redefining sensitivity and performance in angling. Unparalleled sensitivity without compromise. Its exceptional characteristics stem from the utilization of the highest viscosity polyamide, enabling a pre-stretch during production, preserving outstanding tensile strength.

The result is a monofilament with significantly lower elasticity, superior softness, and minimal memory. It provides anglers with a highly sensitive fishing line, allowing the detection of even the subtlest bites. This blend of sensitivity and performance marks HX-Myth as a go-to choice for anglers seeking precision feel and handling.

MONOFILAMENT LINE

ULTRA KNOT

An exceptionally soft, smooth and supple fishing line with great tensile and knot strength. XL Strong is a very versatile monofilament fishing line that is perfect for a wide variety of fresh and salt water fishing applications. This smooth line is exceptional for casting by offering a low memory, reduced twisting, less kinks and fewer backlashes than stiffer monofilaments. Made with a super copolymer nylon formula, XL Strong offers increased toughness and excellent abrasion resistance. This low stretch nylon provides quick and controlled hook sets with high shock strength that helps you land more fish.

FEATURES

- Low memory
- High knot strength, suppleness and good abrasion resistance
- Ultra high knot strength & extra supple G2 winding on 100 m x 10 & 150 spools

PROFESSIONAL FISHING LINE

Professional:

- Perfect for trolling.
- 5 x 100 m recommended for professional anglers
- 1kg spool to cover all saltwater fishing technique with different diameters.
- Good abrasion resistance

Hand-Caster:

- Monofilament 100% copolymer. Exceptional traction and knot resistance, and high abrasion resistance.
- With reduced elasticity, it provides an excellent response to the bite, but still retains "dampening" qualities during crucial fighting moments when the fish is approaching the rod.
