A Living Heritage
Company - France

Passionate anglers with over 100 years of expertise in fish hook manufacturing and marketing, we remain committed to constant innovation — delivering ever-improving, high-quality products while embracing sustainable practices.

At VMC®, manufacturing is more than production — it's a legacy. For over a century, our craft has been passed down through generations of engineers and artisans united by one passion: creating the most reliable, high-performance hooks for anglers worldwide. Our dedication to technical excellence is rooted in our heritage, and we honor it by investing in advanced processes and continuous product improvement.

Customer focus is in our DNA. We actively listen to the fishing community — from professionals to weekend hobbyists — to better understand your needs and deliver products that make a real difference on the water.

Innovation drives our future. We use advanced materials, precision engineering, and state-of-the-art manufacturing, backed by rigorous testing, to build durable, high-performing hooks. Sustainability is central: we replace harmful materials with greener alternatives, reduce water use, and minimize industrial waste.

Our iconic red and white global packaging reflects not only our strong brand identity but also our eco-conscious values. From using eco-friendly materials to sourcing locally, we strive to exceed global standards in responsible packaging.

Our social values matter too. With an average employee tenure of nearly 15 years and multi-generational contributions, we're proud of the loyalty and commitment within our team — a true reflection of VMC®'s industrial heritage.

For the 2025/2026 season, new challenges and opportunities lie ahead. The VMC® team is ready to support you with ever more technical, innovative, and dependable products — for those who seek excellence and a brand that listens and leads.

From all of us at VMC®, wishing you a great season, tight lines, and memorable moments on the water.

I VMC POINTS I

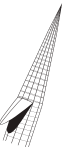

NEEDLE SHARP™

VMC® Needle Sharp™ is the very latest in premium point technology from VMC®, the result of a unique point-grinding process, chemically sharpened to perfection.

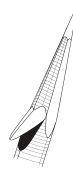

SPARK POINT®

Developed exclusively by VMC® for ultimate performance hooks. A premium point hardened by forming, followed by chemical sharpening ensures permanent hook sharpness. Front and back reinforcement ribs guarantee the point's rigidity. Energy channels increase the speed of penetration and optimise the point's driving force upon striking.

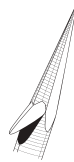

NEEDLE CONE

The result of a sharpening technique that gathers the metal fibers and squeezes them toward the center of the point. By compressing rather than cutting, VMC® has created a point equal or superior in sharpness to the best available and incredibly stronger.

CONE CUT®

The point that combines sharpness, structural stability and quality thanks to a conical tip, a triangular crest and a barb so fine that it assures, without force, a clean and perfect penetration beyond the barb.

CUT POINT

The traditional hook point with excellent penetration capacity. This standard hook point is the most widely manufactured in the world. All VMC® hooks beginning with the number "9" have a standard Cut Point, unless otherwise indicated.

DYNACUT™ POINT

Developed for Big Game Fishing The geometry of the Dynacut point allows the hook to easily penetrate the hardest part of the jaw of Big Game species such as marlin, shark and giant tuna, instantly providing a perfect setting of the hook for a safe and clean fight.

I VMC STEELS I

Carbon stabilizes iron during temperature changes. The higher the level of carbon, the stronger the steel. VMC® uses premium-quality high carbon steel to give a thinner hook the highest quality point and durability.

VMC® Vanadium® hooks owe their success to their lightness allied with their incredible resistance : up to 25 % increased strength. VMC® Vanadium® steel is perfect for any finesse-style hooks that require instant penetration.

Reserved for special professional and premium sport hook series, stainless steel is perfect for deep sea fishing, salmon and big fish. Ultimate corrosion resistance requiring no further coating.

I VMC COATINGS I

An optimum level of corrosion resistance exists for each individual fishing application. You can depend on VMC® coatings to preserve the unique sharpness, strength, shape and finish of our hooks for as long as you need them to last. The wide range of VMC® coatings offers an efficient solution adapted to every fishing condition.

- TR - TIN RED
- CT - COASTAL PTFE

- PS - PERMASTEEL®
- 1000+** HOURS !

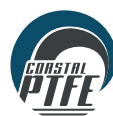

These coloured hooks receive a thin layer of unique varnish that covers the hook without affecting the sharpness of its point. The varnish creates a shield on Hi-Carbon and Vanadium® steel by covering the entire hook surface. When fishing in freshwater, these VMC® coatings will preserve hook sharpness, strength and appearance to the highest possible level.

Tin and Tin Red coatings are highly recommended for all saltwater fishing applications, particularly those involving intense friction such as trolling or when in direct contact with stainless steel.

The perfect balance between coating thickness and point sharpness, to ensure optimum hook performance and resistance against corrosion.

Smooth P.T.F.E. coating is now available on a number of VMC® premium models. This technical coating improves hook discretion and increases penetration speed by 50 %.

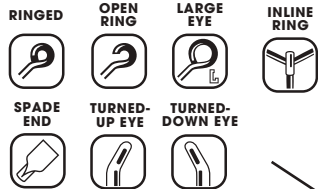

The Coastal PTFE coating (CT) is 5 times more corrosion resistant than a PTFE. It increases the penetration speed by 50% compared with a classic black nickel coating. This exclusive technology is the result of 3 years intensive researches at the VMC factory in France. The new Coastal Black finish, unique to VMC®, is the ultimate combination of an innovative coating for extreme corrosion resistance and a premium hook finishing process for maximum sharpness.

The original anti-corrosion coating by excellence, exclusive to VMC®.

The PermaSteel® secret formula creates a 100% protective shield for even the most vulnerable areas of the hook, whilst maintaining ultimate point sharpness.

VMC® PermaSteel® prevents signs of corrosion in saltwater for over 1000 hours.

END

STRENGTH

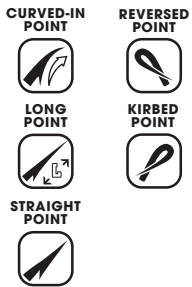

1X strong, 2X strong etc. refers to wire thickness.

SHANK

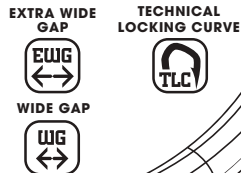

POINT

GAP/BEND

The gap and shape of the hook bend impact the hooking rate and resistance to opening.

PROFILE

FORGING

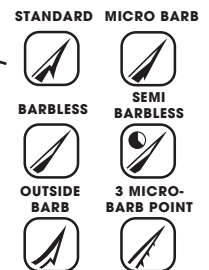

Forging the hook wire improves the opening resistance.

STEEL

BARB

A close-up photograph of a black treble fishing hook resting on a weathered, reddish-brown metal surface. In the background, a red and white VMC packaging box is visible, slightly out of focus. The box features the VMC logo and text in both English and Finnish. The background is a blurred natural setting with green foliage.

A close-up photograph of a hand holding a fishing lure. The lure is elongated and tapers towards the tail, featuring a vibrant pattern of green, yellow, and black. It has a silver-colored metal ring at the head and two large, curved orange hooks at the tail. The background is a soft, out-of-focus green, suggesting a natural outdoor setting.

Cheboo® NED

| The NED version of the Cheboo® range finally available! Custom snap for easy and fast rigging of dedicated hooks (ChebOo Lok and Offset ChebOo and now TechSet Trailer). | This rig allows you to present your soft lure in a different way: always above the bottom and therefore within reach for predators! | This technique will allow you to fish slowly on the bottom and target high pressured fish!

The image features two fishing jigs on a reflective, light blue surface. The jig on the right is a tiger-striped jig with a yellow body, black stripes, and a large, realistic eye. It has a black hook and a small black ring. The jig on the left is a bright orange, frog-like jig with a large black eye. The background is blurred, showing green and blue elements, possibly aquatic plants or a tank environment. The text "JIG HEADS" is centered over the image in a bold, white, sans-serif font.

BABY MUSTACHE SHALLOW

| The family is growing... a real magnet for big pike! | The «mini» version of our MUSTACHE is twice as light as the Mustache Shallow without compromising on the amount of bucktail. | Once wet it only weights 22g, so it allows the use of lighter rods. | No need anymore to have an XH rod to swim a Mustache! | This Baby version is perfect for rigging 14 to 18cm lures which makes it extremely versatile.

3521 TURN LOCK SNAP

| Probably the easiest snap to use. A quarter turn is enough to secure your lure! | Sizes 10 to 4 are perfect for predators like perch, zander, and pike. | The larger sizes (4 and 2) are widely used in sea fishing for bass and bluefin tuna when quick and easy lure changes are necessary. | The integrated rolling feature prevents the leader from twisting.

WIRE LEADER

TITANIUM COIL 1X1

NEW

| Titanium is the most reliable material for creating leaders for Predators with sharp teeth. | This material is knotable (Clinch knot) and thus easy to use (no sleeve needed). | Resistant to abrasion and impacts. | Small diameters are also ideal for perch fishing.

	Code navigation	Barcode	Strength	Diameter	Length	RRP
NEW	AVM160062		6lbs / 3kg	0.25mm	4,5m	61.40 PLN
